ON ITEMS NOT MARKED POSTPAID BE SURE YOUR REMITTANCE INCLUDES THE NECESSARY POSTAGE.

We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds or hulhs we sell, and we will not he responsihle for the crop. No reputable seedsman gives any warranty. We have the fullest confidence in the quality of all the seeds we sell, hut we have no control over them after they leave our hands. Satisfactory germination and production are dependent upon many factors other than the quality of the seed. This is why responsihle seedsmen cannot give a warranty.

		Dollars	Cents

Tear Off Along This Line

Does this order include everything you need in vegetable, flower and field crop seeds, fertilizers, sprays, dusts, spraying and dusting machines, garden tools, cans and canning equipment, poultry and bee supplies? Extra order blanks and envelopes sent upon application.

PLEASE WRITE BELOW

The names of several of your neighbors or friends who you believe might be interested in receiving a copy of our catalog.

NAMES	POST OFFICE	P.O.Box, Street, or R.F.D.	STATE

Important Directions to Customers

By carefully observing the following directions, mistakes and misunderstandings will be very largely avoided.

How to Order

Please be careful to sign your name, box number, street or rural route, post office and State on every order. Be sure to tell us your nearest express or freight office should you desire the seed forwarded by express or freight. **Please write plainly.**

Cash With Order

Ours is a cash business and our prices are made on that basis. Customers are requested to remit when ordering and by so doing save the C. O. D. fee charged by express companies, banks, and postal authorities for collecting and returning money.

C. O. D.

Perishable items such as strawberry plants, rose bushes, nursery stock, etc., are not sent C. O. D. under any circumstances.

How to Send Money

Remittances should be made by post-office money orders, express money orders, drafts or checks.

Remittance by Stamps

On orders for seeds where the amount is less than 50 cents, we will accept stamps in good condition the same as cash, but we would ask those remitting stamps to wrap them in oiled paper, if possible, to prevent their sticking together or to the order.

Export Shipments to Cuba, the West Indies, and Foreign Countries

For the convenience of our customers in the West Indies we have established the following agencies: M J. Diaz y Cia, Muralla 75, Havana, Cuba; Mr. A. C. Kopf, Neuva Gerona, Isle of Pines; Mr. F. C. Albury, Nassau, Bahamas; Mr. J. P. Klein, 321 Ochoa Bldg., San Juan, Puerto Rico; Mr. Leslie R. Mordecai, 158 Harbour St., Kingston, Jamaica. These agents carry a full line of Kilgore's seeds during the season.

Prices Subject to Change

This Catalog is printed in June and July. The market on many items of garden and field seeds, as well as supplies, has not yet been fully established. Consequently, prices on these items indicate value at time these pages are printed. In practically all cases orders will be filled at prices indicated in this Catalog, but **all prices are subject to change without notice.**

Seeds Postpaid by Parcel Post

Please bear in mind that the prices given in this Catalog include delivery on all seeds to any point in Florida and other southern states.

All Deliveries Outside the United States are made F. O. B. Plant City, Florida

Non-Warranty

We give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds or bulbs we sell, and we will not be responsible for the crop.

No reputable seedsman gives any warranty. We test our seeds for germination and trueness to type before we send them to our customers. We have the fullest confidence in the quality of all the seeds we sell but we have no control over them after they leave our hands. Satisfactory germination and production are dependent upon many factors other than the quality of the seed, such as methods of planting, cultivating, and fertilizing. If we should warrant or guarantee seeds in any way, we could be held responsible for the failure of the crop, regardless of cause; a responsibility we cannot accept.

No Seeds Returned

For your protection we will not permit seeds to be returned, unless mistake was made in filling order. No customer would want to plant seeds that had been returned, nor would we feel safe in filling an order with returned seed. This is one reason we have never followed the policy of putting out our seeds with dealers. Our seeds are never out of our hands until they are sold to you direct through our mail-order department or through one of our own stores or agencies.

Order Early

The demand for our "Bred-Rite" brands of seeds is so great that each year we find ourselves completely sold out on many items before the season is over. Therefore, it behooves our friends to order or book their season's requirements early so as to be sure of being able to secure their supply of our high-quality seeds. It will also greatly facilitate shipments if orders are sent in early. We aim to ship all orders the same day they are received, but sometimes it is impossible during the rush season.

For Your Convenience

Two order blanks are placed in this Catalog for your convenience, one inside the front cover and another inside the back cover. A second order during the season is frequently necessary. Additional order blanks furnished upon request.

Postal Information

PARCEL-POST RATES WITHIN THE UNITED STATES

New postal rates went into effect on October 1, 1932. The weight limit for all zones is 70 pounds.

From the Fourth to the Eighth Zone, shipments weighing 10 pounds or more usually go as cheaply by express. Any weight up to 40 pounds in the first and second zones and 22 pounds in the third zone will usually go just as cheaply by parcel post as by freight or express.

In many sections of Florida that are not easily accessible by freight or express, parcel-post service will be found not only far more satisfactory, but more economical. If you are on a rural route, delivery will be made to your door by mail.

Most Florida points are in the First or Second Zone; however, Jacksonville north, Live Oak north and west, and points on the East Coast south of Delray are in the Third Zone.

First and second zone, first pound 8c, 2 pounds 10c, each additional pound over 2 pounds add 1c per pound.

	First lb.	Each Additional lb.
Third Zone	9 cts.	2 cts.
Fourth Zone	10 cts.	3.5 cts.
Fifth Zone	11 cts.	5.3 cts.
Sixth Zone	12 cts.	7 cts.
Seventh Zone	14 cts.	9 cts.
Eighth Zone	15 cts.	11 cts.

Parcel-Post Zones

First Zone, within 50 miles from Plant City, Fla.
Second Zone, within 50 to 150 miles from Plant City, Fla.
Third Zone, within 150 to 300 miles from Plant City, Fla.
Fourth Zone, within 300 to 600 miles from Plant City, Fla.
Fifth Zone, within 600 to 1000 miles from Plant City, Fla.
Sixth Zone, within 1000 to 1400 miles from Plant City, Fla.
Seventh Zone, within 1400 to 1800 miles from Plant City, Fla.
Eighth Zone, all over 1800 miles from Plant City, Fla.

If in doubt about your zone rate, obtain it from your postmaster and be sure to send enough to cover necessary postage. If you send too much, it will be returned to you.

When you order your seeds to come by express or freight we can send them collect, so you may pay the transportation charges on delivery. When ordering your seeds to be shipped by express or freight, always give your express or freight station, if it is not the same as your post-office. If your order is to be sent parcel-post, the postage must be paid in advance if the items ordered are not indicated as "postpaid" in this catalog, and you must send us the amount of postage in addition to the cost of the seeds. Do not have your order delayed or reduced by failing to add necessary postage. It will be found plainly stated above each item whether or not it is postpaid.

Parcel-Post Service With Cuba

Effective September 1, 1930, the parcel-post rate to Cuba was made 14 cts. for each pound or fraction thereof. The maximum weight limit is 22 pounds, minimum 8 ounces. Packages of merchandise weighing 8 ounces or less are subject to the postage rate of 1½ cts. for each 2 ounces or fraction of 2 ounces.

HOW TO PLANT HOME GARDEN VEGETABLES

HOW TO USE THE FOLLOWING TABLE

The time requirements indicated for crops to reach edible size varies, of course, according to the season, varieties and soil conditions. Allowance also must be made for the relative estimate of the yields, due to climatic and soil conditions. However, the averages indicated in the table will be found to be fairly accurate for Florida and southern growing conditions on the basis of many years of observation.

VEGETABLES	Number of Running Feet of Row for Family of Five	Seeds or Plants to Provide for Family of Five	Depth to Cover Inches	Space Between Rows	Set Plants or Thin Out to Inches	Approximate Time Required to Produce Crop from Seed or Transplanting. Days
Beans (Bush, String)	200 ft.	4 lbs.	2 in.	2 ft.	2 to 3 in.	42 to 55
Beans (Pole, String)	80 to 100 hills	¼ lb.	2 in.	3 to 4 ft.	3 ft. (hills)	60 to 63
Beans (Bush, Lima)	40 ft.	1 lb.	1 in.	2½ to 3 ft.	2 ft. (hills)	60 to 65
Beans (Pole, Lima)	20 hills	½ lb.	1 in.	3 ft.	3 ft. (hills)	75
Beet	80 ft.	2 oz.	½ to 1 in.	18 in.	2 to 3 in.	68 to 76
Broccoli	20 ft.	1 pkt.	½ to 1 in.	2½ ft.	24 in.	115
Brussels Sprouts	20 ft.	1 pkt. or 15	½ in.	2½ ft.	24 in.	90
Cabbage	60 ft.	36	½ in.	2 to 3 ft.	18 to 24 in.	80 to 110
Chinese Cabbage	20 ft.	1 pkt.	¼ in.	2½ ft.	12 in.	85
Cantaloupe	10 hills	1 pkt.	½ to 1 in.	4 ft.	4 ft. (hills)	70 to 100
Carrot	40 ft.	½ oz.	½ in.	1½ to 2 ft.	2 to 3 in.	75 to 92
Cauliflower	20 ft.	24	½ in.	2 to 3 ft.	2 ft.	100
Collards	50 ft.	1 pkt. or 30	½ in.	2 to 3 ft.	18 in.	60
Corn (Sweet)	200 ft.	1 lb.	2 in.	3 ft.	12 in.	65 to 80
Corn (Roasting Ear)	300 ft.	1 lb.	2 in.	3 ft.	18 to 24 in.	68 to 85
Cucumber	10 hills	1 pkt.	¾ in.	4 to 5 ft.	3 to 4 ft. (hills)	42 to 52
Eggplant	30 ft.	12	½ in.	4 to 5 ft.	36 in.	115 to 125
Endive (Escarolle)	40 ft.	1 pkt.	⅛ in.	2 ft.	12 in.	70
Kale	20 ft.	1 pkt.	⅛ in.	2½ ft.	12 in.	70
Kohl Rabi	60 ft.	1 pkt.	¼ to ½ in.	1½ to 2 ft.	4 to 6 in.	50
Lettuce	150 ft.	2 oz.	¼ in.	1½ to 2 ft.	10 to 12 in.	60 to 74

WHAT AND WHEN TO PLANT IN FLORIDA

(VEGETABLE AND FIELD SEEDS)

JANUARY AND FEBRUARY. Beets, Beans, Brussels Sprouts, Cabbage, Chinese Cabbage, Cantaloupes, Carrots, Collards, Cauliflower, Sweet Corn, Cucumbers, Eggplants, Endive, Kale, Kohl Rabi, Lettuce, Mustard, Onion Seed, Onion Sets, Parsnips, Parsley, Peppers, Garden Peas, Potatoes, Radishes, Rape, Romaine, Rye, Sage, Salsify, Spinach, Squash, Tomatoes, Turnips, Rutabagas, Watermelon.

MARCH. Pole, Lima, Bush, and Field Beans; Benne, Bermuda, and all other Grasses, Cabbage, Carrots, Cantaloupes, Chufas, Collards, Crotalaria, Cucumbers, Eggplant, Kale, Kohl Rabi, Lettuce, Mustard; Sweet, Field, Kaffir, and Pop-Corn; Potatoes, Radishes, Golden and Pearl Millet, Okra, Tomatoes, Turnips, Cowpeas, Velvet and Soy Beans; Peanuts, Pumpkins, Rice, Rape, Spinach, Sorghum, Sage, Squashes, Sunflower, Egyptian Wheat, and Watermelons.

APRIL. Pole and Field Beans, all Grasses, Cantaloupes, Cowpeas, Beggarweed, Chufas, Benne, Field, Kaffir, and Pop-Corn; Crotalaria; Velvet and Soy Beans; Cattail and Golden Millet, Mustard, Okra, Peanuts, Pumpkins, Radishes, Rice, Sorghum, Sunflower, Watermelon, and Egyptian Wheat.

MAY. Pole and Field Beans; Benne, Beggarweed, Crotalaria, various Grasses; Field, Kaffir, and Pop-Corn; Chufas; Velvet and Soy Beans; Millet, Cowpeas, Peanuts, Pumpkins, Rice, Radishes, Sorghum, Sunflower, Okra, and Egyptian Wheat.

JUNE. Beggarweed, Chufas, Collards, Crotalaria, various Grasses, Eggplants, Egyptian Wheat, Velvet and Soy Beans, June and Kaffir Corn, Millet, Cowpeas, Peanuts, Peppers, Rice, Okra, Mustard, Sorghum, Sunflower, Turnips, Rutabagas.

JULY. Beggarweed, Celery, Chufas, Eggplants, various Grasses, Collards, Kaffir Corn, Mustard, Millets, Okra, Cowpeas, Spanish Peanuts, Peppers, Rice, Sorghum, Turnips and Rutabagas, all varieties Velvet and Soy Beans; and Sunflower.

AUGUST. Broccoli, Brussels Sprouts, Cabbage, Chinese Cabbage, Cucumbers, Cauliflower, Celery, Collards, Eggplants, Endive, Kale, Lettuce, Grasses, Golden Miflet, Peppers, Fall Potatoes, Mustard, Okra, Onion Sets, Cowpeas, Radishes, Spinach, Squashes, Tomatoes, Sunflowers, Sorghum, Turnips, and Rutabagas.

SEPTEMBER. Bush Beans, Beets, Broccoli, Brussels Sprouts, Cabbage, Chinese Cabbage, Carrots, Cauliflower, Celery, Collards, Cucumbers, Endive, Grasses, Kale, Kohl Rabi, Lettuce, Mustard, Okra, Onion Seed and Sets, Parsnips, Parsley, Garden Peas, Irish Potatoes, Rye, Radishes, Rape, Romaine, Sage, Spinach, Squashes, Tomatoes, Turnips, and Rutabagas.

OCTOBER. Various Grasses, Bush Beans, Beets, Broccoli, Brussels Sprouts, Cabbage, Chinese Cabbage, Carrots, Cauliflower, Celery, Collards, Endive, Kale, Kohl Rabi, Lettuce, Mustard, Onion Seed and Sets, Parsnips, Parsley, Garden Peas, Potatoes, Rye, Radishes, Rape, Romaine, Spinach, Turnips, Rutabagas, Oats, and Sage.

NOVEMBER. Carpet and Rye Grasses, Beets, Broccoli, Brussels Sprouts, Cabhage, Chinese Cabbage, Carrots, Cauliflower, Eggplants, Endive, Kale, Kohl Rabi, Lettuce, Mustard, Onion Seed and Sets, Parsnips, Parsley, Potatoes, Garden Peas, Pepper, Rye, Radishes, Rape, Romaine, Sage, Spinach, Turnips, Rutabagas, Oats, and Vetch.

DECEMBER. Beets, Broccoli, Brussels Sprouts, Cabbage, Carrots, Chinese Cabbage, Cauliflower, Celery, Collards, Eggplants, Endive, Kale, Kohl Rabi, Lettuce, Mustard, Onion Seed and Sets, Parsnips, Parsley, Potatoes, Garden Peas, Pepper, Rye, Radishes, Rape, Sage, Spinach, Turnips, Rutabagas, and Oats.

If interested in flowers write for "Kilgore's Flower Planting Guide for the South"

The Kilgore Seed Co., General Offices and Mail Order Dept., Plant City, Florida. Twelve Kilgore Stores Serving Florida.

Vegetable Seed Collections for the Home Gardener

The possibilities of a home garden should be given more attention by Florida farmers and townspeople.

In traveling through farming sections and small towns of Florida it is strange to find so few home gardens providing a bountiful supply of good, wholesome, fresh vegetables for the home table. Florida climate and soils are favorable to producing the finest home gardens in the United States. Unlike any other state in the Union, in Florida fresh vegetables can be grown every month in the year.

Even if it were possihle to purchase vegetables more cheaply than to produce them, yet would it not be much more desirable to have a large variety of fresh vegetables of your own growing available at a moment's notice in your own garden?

In Florida, a well-kept garden can be had with little effort and small expense and, as many test plantings have revealed, will yield a return several times as large as that from an equal area devoted to any other crop that could be grown on Florida farms.

Doctors, nurses and dieticians all advise the use of a plentiful supply of fresh vegetables in the diet in order to provide the essentials which are so necessary for the health and well-being of the human system. Experts tell us that vegetables contain a higher percentage of these body-regulating essentials, such as mineral salts, vitamins and roughage, than are contained in any other food or food product. Statistics prove that people who eat lots of fresh vegetables throughout the year have less sickness and fewer doctor bills to pay than people who use fresh vegetables sparingly.

Make a home garden this season. It will be a source of health, pleasure and profit to you and your family.

COLLECTION No. 1

Sixteen Large Packets Sixteen Kinds

All for 50c Postpaid

1 pkt. B. R. Early Blood-Red Market Beet
1 pkt. B. R. Charleston Wakefield Cabbage
1 pkt. Pekin Celery (Chinese) Cabbage

2 Varieties of Beans, 2 Varieties of Sweet or Roasting Ear Corn, and 1 Variety of English Peas. One packet of each, all of your own selection.

THE KILGORE SEED COMPANY

GENERAL OFFICES AND MAIL ORDER DEPARTMENT, -:- PLANT CITY, FLORIDA

BEANS

CULTURE. For a fall crop, plant from the middle of August until the middle of October; for a main crop on the Florida East Coast plant from October to December. Plant seeds in drills, dropping a bean every 1½ to 2 inches, and cover 2 inches deep. Use a high grade bean or vegetable fertilizer. On muck soils apply 600 to 1200 pounds of fertilizer per acre. On sandy loam apply 1200 to 2000 pounds per acre, making one application. Ground should be thoroughly prepared, and fertilizer put out from a week to ten days before planting. There is always a risk of the fertilizer burning and killing the vitality of the seed when both are put in at the same time, and if the vitality is not killed it may cause the beans to come up bald-headed.

Our Bean seed is strictly first-class, high germinating, disease free, guaranteed western-grown stock. None of our Bean seed is grown in the South or East. All Bean prices quoted are postpaid. Write for prices on larger quantities.

Kilgore's Golden Bountiful Wax

GREEN PODDED BUSH BEANS

Plant 3 pecks to 1 bushel per acre

BOUNTIFUL. (45 days.) A vigorous grower, very productive, with very large, beautiful, long, broad, flat, thick pods, slightly curved, of light green color, entirely stringless, tender, and of excellent quality.
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

GIANT STRINGLESS GREEN POD. (48 days.) Pods are round, long, meaty, thick, curved, and entirely stringless when young or old, of excellent quality, and a very heavy yielder.
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

KILGORE'S STRINGLESS BLACK VALENTINE. (42 days.) This variety possesses all the desirable characteristics of the regular Black Valentine, and in addition, it is completely stringless. Attractive in appearance, of high edible quality, an enormous yielder, and a good shipper, this variety has become one of Florida's leaders.
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

TENDERGREEN. (48 days.) This variety is becoming more and more popular due to its excellent shipping qualities and productiveness. It is as early as Giant Stringless, and the plants are large and very erect. The five to six-inch pods are round, fleshy, dark green, absolutely stringless, and of fine quality. Very desirable for home and market.
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

FULL MEASURE. (45 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

KILGORE'S STRINGLESS LONG ROUND GREEN POD. (43 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

EARLY SPECKLED RED VALENTINE. (43 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

TENNESSEE GREEN POD. (42 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

LONGFELLOW. (45 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

REFUGEE. (1000-1) (55 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

GREEN PODDED POLE BEANS

Plant 1 peck per acre

KENTUCKY WONDER. (OLD HOMESTEAD) (66 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

TENNESSEE WONDER. (63 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

KILGORE'S GENUINE CORNFIELD. (58 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

McCASLAN. (60 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

WAX PODDED BUSH BEANS

Plant 3 pecks to 1 bushel per acre

KILGORE'S GOLDEN BOUNTIFUL WAX. (45 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

KILGORE'S NEW IMPROVED KIDNEY WAX. (45 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

SURE CROP WAX. (45 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

HODSON WAX. (55 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

LIMA BEANS

Fordhooks—Plant 1 bushel per acre
Henderson's—Plant 1 to 2 pecks per acre
New Marvel—Plant 2 to 3 pecks per acre
Challenger—Plant 1 peck per acre
Large Green Seeded Pole—Plant 1 peck per acre

FORDHOOK BUSH LIMA. (65 days.)
¼ lb. 10c; 1 lb. 35c; 2 lbs. 60c.

HENDERSON BUSH LIMA. (BABY LIMA) (60 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

KILGORE'S NEW MARVEL BUSH LIMA. (NEW.) (62 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

CHALLENGER POLE LIMA. (75 days.)
¼ lb. 10c; 1 lb. 35c; 2 lbs. 60c.

LARGE GREEN SEEDED POLE. (78 days.)
¼ lb. 10c; 1 lb. 35c; 2 lbs. 60c.

BUTTER OR GREEN SHELL BEANS

Old Florida Pole—Plant 1 peck per acre
Old Florida Bush—Plant 1 to 2 pecks per acre
French's Horticultural Bush—Plant 1 to 2 pecks per acre

OLD FLORIDA BUSH. (75 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

OLD FLORIDA POLE. (65 days.)
¼ lb. 10c; 1 lb. 30c; 2 lbs. 50c.

FRENCH'S HORTICULTURAL BUSH. (SPECKLED CRANBERRY) (60 days.)
¼ lb. 10c; 1 lb. 35c; 2 lbs. 50c.

BEET

Plant 6 pounds per acre

CULTURE. Successful culture demands good soil, medium moist, to which has been applied 600 to 1,200 pounds of good fertilizer. Plant seeds in rows 2 feet apart and when 3 inches high thin out to 3 inches apart in the row. In Florida and the South, sow from latter part of September to March.

Prices quoted are postpaid. Write for prices on larger quantities.

KILGORE'S EARLY BLOOD-RED MARKET. (68 days.) One of the earliest and finest Beets ever introduced. Uniform in shape, size, and color. Roots very attractive in appearance, slightly flattened, almost globe-shaped, entirely free of fibrous roots or strings, of dark red color outside; flesh of deep purple color with very little zoning. A money-maker on any market.

Pkt. 5c; ¼lb. 30c; 1 lb. $1.00.

CROSBY'S EGYPTIAN. (74 days.) This standard variety produces Beets of uniform flattened globe shape, very much flattened at the top, of deep red color outside, with a deep purple color with little zoning inside. Sweet, tender, and of very good quality.

Pkt. 5c; ¼lb. 25c; 1 lb. 90c.

EARLY WONDER. (72 days.) This is a very popular selection from Crosby's Egyptian. It is very early, nearly globe-shaped, being fuller at the bottom than Crosby's Egyptian, with deep purple flesh, showing practically no white zoning, and with very small tops. The roots are very smooth and mature evenly.

Pkt. 5c; ¼lb. 25c; 1 lb. 90c.

DETROIT DARK RED. (76 days.) A very desirable, globe-shaped Beet, of dark red color, outside as well as inside, without white zoning; sweet and of excellent quality.

Pkt. 5c; ¼lb. 25c; 1 lb. 90c.

Typical Plants of Kilgore's Early Blood-Red Market Beet

SWISS CHARD or SPINACH BEET

LUCULLUS. Plant like beets in the fall, winter, or spring. Stalks may be cooked and served like asparagus, or the stalks and leaves may be cooked and served as greens like spinach. Makes a fine green food for chickens.

Pkt. 5c; ¼lb. 25c; 1 lb. 90c.

SUGAR AND STOCK BEET

CULTURE. Plant 4 to 6 pounds per acre in rows 2 to 3 feet apart, and thin to 6 inches apart.

STOCK BEET, LONG RED GIANT. (80 days.) An enormous yielder and one of the very best for dairymen.

Pkt. 5c; ¼lb. 20c; 1 lb. 65c.

SUGAR BEET, KLEIN WANZLEBEN. (80 days.) This variety is one of the most valuable for sugar making and stock feeding. **Pkt. 5c; ¼lb. 20c; 1 lb. 65c.**

Kilgore's Bred-Rite Italian Green Sprouting Broccoli

BROCCOLI

Sow ¼ to ½ pound in seed-bed to plant an acre

KILGORE'S BRED-RITE ITALIAN GREEN SPROUTING OR CHRISTMAS CALABRESE. (115 days.) This is the true Calabrese type which is a tremendous yielder. In Florida, seed may be planted in seed-beds from September to January. Plants should be set in rows 2½ to 3 feet apart, and 1½ feet apart in the row. Similar to cauliflower, but more hardy and the so-called head is bluish-green instead of white. When the main head is cut, branches form at the base of each leaf on the stalks below. At the end of each branch a small loose green head develops. These small heads should be cut with 6 to 8 inches of stem, and tied in bunches for market. Stems, as well as flower-heads, are cooked and served like asparagus or cauliflower. A most delicious vegetable. **Pkt. 5c; ½oz. 20c; oz. 30c; ¼lb. $1.00; 1 lb. $3.00, postpaid.**

BRUSSELS SPROUTS

Sow ¼ pound in seed-bed to plant an acre

CULTURE. Sow seed and cultivate exactly the same as cabbage.

IMPROVED LONG ISLAND. (90 days.) The best and most dependable variety for market and home use. Very productive and of excellent quality.

Pkt. 5c; oz. 25c; ¼lb. 60c; 1 lb. $2.00, postpaid.

CABBAGE

Sow 6 ounces in seed-bed to plant an acre, or plant 12 ounces per acre in field

CULTURE. Cabbage is a good fall and winter crop for Florida and the South. In Florida, cabbage may be planted from August to March, but heaviest plantings are made in September and October. Cabbage is a heavy feeder and should be grown rapidly. Therefore, for best results, plenty of fertilizer should be used—not less than 1000 pounds per acre, and a ton is better. You cannot grow a big, heavy crop of cabbage on a starvation ration. Where planted in seed-beds, which is desirable, plant seed thin in drills 6 inches apart. Make rows 2½ to 3 feet apart and set plants 12 to 15 inches apart in row, depending on size of head you wish to produce. If you desire small heads, crowd the plants; for large heads, place farther apart. It is recommended to treat cabbage seed with Semesan or some other good disinfectant before planting. Write us or ask our store managers for directions.

A Comparison of Our Bred-Rite Cabbage Varieties

1. Bred-Rite Early Jersey Wakefield. 2. Bred-Rite Charleston Wakefield. 3. Bred-Rite Copenhagen Market.

For Best Results Plant Kilgore's Bred-Rite Brands of Cabbage Seed Which Have Been Developed and Selected for Uniformity, High Yield, and Trueness to Type. In Planting Bred-Rite Cabbage Seed you Take No Chances Because You Are Planting Tested and Proved Seed.

Prices quoted are postpaid. Write for prices on larger quantities.

KILGORE'S BRED-RITE EARLY JERSEY WAKEFIELD. (80 days.) Our Bred-Rite stock has been bred and selected especially for earliness. The small, medium-sized, conical-shaped, pointed heads are very firm, and of finest quality.

Pkt. 5c; oz. 20c; ¼lb. 50c; 1 lb. $1.75.

KILGORE'S BRED-RITE CHARLESTON WAKEFIELD. (85 days.) The heads are larger and broader at the base, not quite so pointed and slightly later in maturing than our Bred-Rite Early Jersey Wakefield. Of uniform size, very solid, and of very desirable market quality.

Pkt. 5c; oz. 20c; ¼lb. 50c; 1 lb. $1.75.

EARLY WINNINGSTADT. (90 days.) Very hardy and dependable. Heads extremely firm, heart-shaped with a sharp point and a broad base. Particularly valuable for shipping. Does not crack readily, and can be held in the field for a considerable time.

Pkt. 5c; oz. 25c; ¼lb. 60c; 1 lb. $2.00.

KILGORE'S BRED-RITE GOLDEN ACRE. (80 days.) An extremely early, small to medium-sized round-head cabbage of the Copenhagen Market type. Our strain of this variety heads up very uniformly, and is exceptionally well bred.

Pkt. 5c; oz. 25c; ¼lb. 75c; 1 lb. $2.50.

AMERICA. (80 days.) One of the earliest medium-sized, round-headed types. The heads stand a long time without bursting and the quality is unsurpassed. It is very uniform in maturing.

Pkt. 5c; oz. 25c; ¼lb. 75c; 1 lb. $2.50.

KILGORE'S BRED-RITE COPENHAGEN MARKET. (85 days.) Our extra-early strain of Bred-Rite Copenhagen Market has become very popular. It is short-stemmed, compact, with very solid, round, medium-sized heads, having few outer leaves, thus facilitating close planting.

Pkt. 5c; oz. 25c; ¼lb. 60c; 1 lb. $2.00.

KILGORE'S BRED-RITE GLORY OF ENKHUIZEN. (95 days.) A splendid medium early, round-headed type. Somewhat similar to Copenhagen Market, but slightly later, larger and a heavier yielder. Of excellent shipping and marketing quality.

Pkt. 5c; oz. 25c; ¼lb. 60c; 1 lb. $2.00.

ALL HEAD EARLY. (95 days.) The large, solid, deep flat heads are uniform in shape, size, and maturity. Withstands heat and drought better than other varieties, and is a very heavy yielder.

Pkt. 5c; oz. 25c; ¼lb. 60c; 1 lb. $2.00.

STEIN'S EARLY FLAT DUTCH. (100 days.) This is an old-standard, hardy, winter variety. It produces a very large-sized plant, spreading in growth, with few large, broad, outer leaves. The head is of large size, flat, and very solid.

Pkt. 5c; oz. 25c; ¼lb. 60c; 1 lb. $2.00.

SAVOY CABBAGE, AMERICAN DRUMHEAD. (100 days.) Savoy Cabbage is commonly called "Curly-leaved" or "Curly" Cabbage. It has a distinct flavor which is favored by many people. The plant is of large growth. The leaves are finely wrinkled or savoyed and curled. The heads are medium in size, slightly flattened, and solid.

Pkt. 5c; oz. 30c; ¼lb. 75c; 1 lb. $2.50.

KILGORE'S IMPROVED HOLLANDER. (105 days.) Heads of medium size, deep, round, very firm and solid. The hardiest of all cabbages, and an ideal type for shipment.

Pkt. 5c; oz. 25c; ¼lb. 70c; 1 lb. $2.25.

KILGORE'S BRED-RITE RED ROCK. (110 days.) Plants compact, not spreading. Heads of small to medium size, very hard, globular in shape, exceedingly attractive in appearance, being of deep purple color throughout. Our stock of this variety has been specially developed for uniformity and high yielding qualities.

Pkt. 5c; oz. 25c; ¼lb. 70; 1 lb. $2.25.

CHINESE CABBAGE

Plant 1 pound per acre

CULTURE. This is distinctly a cool-weather plant and should be planted for a late fall and winter crop because it quickly bolts to seed in hot weather. Seeds should be planted in rows where the crop is to mature, thinning out so the plants stand twelve to fifteen inches in the row.

KILGORE'S IMPROVED PEKIN CELERY CABBAGE. (85 days.) This strain of Chinese Cabbage is absolutely sure-heading, maturing into solid, long, slender heads, readily salable in any market. Hardy and of easy culture, planted direct in the field. A good shipper and an excellent keeper.

Pkt. 5c; oz. 25c; ¼lb. 60c; 1 lb. $2.00, postpaid.

CARROT

Plant 4 pounds per acre

CULTURE. Sow in good rich soil, deeply worked in drills 1½ feet apart, and cover seed ½-inch deep. When 2 inches high, thin out to 4 inches apart. Carrots can be planted in Florida from August to March.

Prices quoted are postpaid.
Write for prices on larger quantities.

KILGORE'S BRED-RITE IMPERATOR. (92 days.) This variety of carrot has been especially bred and developed to meet the increasing demand on the market for a longer carrot with a broad shoulder, averaging about 2¼ inches thick. The roots are smooth, uniformly tapered to a semi-blunt end, averaging 10 inches in length, deep rich orange color, both exterior and interior with comparatively inconspicuous core. From the standpoint of shipping quality, attractiveness and popularity in the market. Kilgore's Imperator is superior to other long-rooted varieties.

Pkt. 5c; ¼ lb. 40c; 1 lb. $1.25.

KILGORE'S IMPROVED RED CORED CHANTENAY. (75 days.) This is an improved type of Chantenay. It is fast becoming the most popular carrot on the market. The roots are tapered, stump rooted, and slightly longer than the old Chantenay, averaging about 6 inches in length. The interior is solid orange colored without the usual lemon color in the core. The flesh is very tender and sweet, which with the excellent outside color and shape combines to make this variety exceptionally valuable for the market.

Pkt. 5c; ¼ lb. 40c; 1 lb. $1.25.

KILGORE'S BRED-RITE CHANTENAY. (85 days.) Our stock of Chantenay runs uniformly smooth and true to type. Our stock is of medium length, thick, and very stump-rooted. The roots average 5½ inches long; 2 to 2½ inches thick at the crown and tapering to 1 to 1½ inches at the bottom. The color is a very attractive bright orange-scarlet.

Pkt. 5c; ¼ lb. 30c; 1 lb. $1.00.

DANVER'S HALF LONG. (90 days.) Our stock of this variety is half stump or semi-pointed, from 7 to 7½ inches in length. The shoulder is from 2 to 2½ inches thick, and tapers uniformly to a thickness of about ¾-inch just where the root begins to taper to the tip.

Pkt. 5c; ¼ lb. 30c; 1 lb. $1.00.

IMPROVED LONG ORANGE. (90 days.) Our stock is the true thick-shouldered strain of Long Orange, 1¾ to 2 inches thick at the shoulders, 10 to 12 inches long, and pointed or rather tapering in a straight line to the tip.

Pkt. 5c; ¼ lb. 30c; 1 lb. $1.00.

CORELESS OR NANTES. (90 days.) We have the true type, which is long and cylindrical, about 6½ to 7 inches long and 1 to 1½ inches thick, very stump-rooted with a small rat tail. The color is clear orange-red and the core is rather undefined.

Pkt. 5c; ¼ lb. 40c; 1 lb. $1.25.

CAULIFLOWER

Sow 4 ounces in seed-bed to plant an acre

Kilgore's Bred-Rite Henderson's Snowball Cauliflower

CULTURE. Cauliflower needs a very rich soil and plenty of moisture. On account of the high price of cauliflower seed, all of which is imported from Denmark, we recommend starting plants in seed-beds where they can be given proper care and attention. Plant from September to January, and cultivate the same as cabbage. Just as soon as the head develops to about the size of a walnut draw the outer leaves over the head, and tie with soft cord to produce attractive, pure white, solid heads.

KILGORE'S BRED-RITE HENDERSON'S SNOWBALL. (100 days.) This is the low heading type, best adapted to Florida and southern growing conditions. In our trials we have tested many different strains of Cauliflower, but we have yet to find one which surpasses our Bred-Rite strain of Henderson's Snowball. A dependable header, starting to head early and uniformly. Heads are medium large, compact, solid, pure white, and of finest quality. A type most desired by southern produce growers and shippers.

Pkt. 5c; ½ oz. 85c; oz. $1.50; ¼ lb. $5.00; 1 lb. $18.00, postpaid.

COLLARDS

Sow ¼ pound in seed-bed to plant an acre, or plant ½ pound per acre in field

CULTURE. Similar to cabbage. May be started in seed-beds or planted direct in field, spacing the plants 2 to 3 feet each way. Can be planted every month in the year in Florida. This vegetable should be in every family garden as it is very hardy and will furnish an abundance of "greens" when other vegetables are gone. Collards will also make fine green feed for chickens and cows.

TRUE GEORGIA WHITEHEAD. (60 days.) An old-time favorite. Stands all sorts of adverse conditions and will make a good crop when other vegetables would fail.

Pkt. 5c; ¼ lb. 15c; 1 lb. 50c, postpaid.

CABBAGE COLLARD. (60 days.) This collard is claimed to be a cross between Georgia collard and Charleston Wakefield cabbage. The heads are not as firm as cabbage, but are very tender and of ideal flavor.

Pkt. 5c; ¼ lb. 20c; 1 lb. 60c, postpaid.

CELERY

Sow ½ pound in seed-bed to plant an acre

CULTURE. For early Celery, first sowings in Florida are made the latter part of June and continue to December. The main sowings for a winter crop are usually made in July or early August, and for the spring crop grown principally on muck they are usually made in October and early November. Celery seed is always planted in seed-beds. The soil must be put in perfect fine condition and made into beds 4 to 6 or more inches high, to prevent overflow in case of heavy rains. When in condition—thoroughly and finely pulverized, well fertilized, moist, and made perfectly smooth and level—sow the seed broadcast or in rows 6 inches apart, using 1 pound of seed to from 125 to 150 yards of bed 3 feet wide. The seed should not be covered but may be pressed lightly into the soil with a very light roller or with a wide board.

Celery plants cannot be grown in the open, especially during summer; therefore we recommend use of burlap or white muslin to be used as a cover, stretching it on a tent-shaped or slanting frame built over the seed-bed, with the sides about 12 inches from the ground. This seed-bed cover will serve as a shade and also break the force of heavy rains. It is also advisable to use ground-covers of burlap or old fertilizer bags which have been thoroughly washed out before using to prevent burning of seed sprouts, on the beds when seed is planted, letting them lie flat on the ground until seed begins to germinate. This prevents heavy rains washing seed off the beds and also keeps the ground cooler during hot months, which insures a better stand. After the seed is sown, it is desirable to sprinkle with cool water by means of hand sprinkling pots in order to keep the soil cool and moist, which tends to increase the germination of celery seed during the hot summer months.

When plants in seed-bed are 6 inches high, transplant to the field in double rows 3 to 3½ feet apart, with 7 inches between the double rows, and set the plants 3½ to 5 inches apart in the row. The plants may be set in single rows 3 feet apart, allowing 3½ to 5 inches between plants in the row. To grow fine Celery, a large supply of moisture and fertilizer is essential from the time the seed is sown in the seed-beds until the crop is ready for harvest. Celery is not a profitable crop to raise without irrigation, and it should receive very heavy applications of high-grade fertilizer, which should be applied before the crop is planted and at frequent intervals during its growth.

Prices quoted are postpaid.

Write for prices on larger quantities.

SCHNECK'S IMPROVED FLORIDA GOLDEN No. 15. (115 days.) After many years of breeding, selecting, and testing by our breeding department, we introduced this improved variety. It is intermediate between the Old Golden and Special or Golden Plume types, possessing the desirable characteristics of both types. It is recommended especially for a Florida mid-winter crop because it withstands cold weather better than most varieties of the Special or Golden Plume type. Our Improved stock has been selected for uniformly long, thick, round ribs, large full hearts of rich golden yellow color, and for heavy yields of good sizes. The ribs average eight to ten inches to the first joint, are not thin and flat, but are rounded and exceptionally thick. The plants range from 22 to 25 inches over all, making a most attractive pack. This is one of the best varieties for a general mid-winter crop in Florida or for a late fall crop in the North.

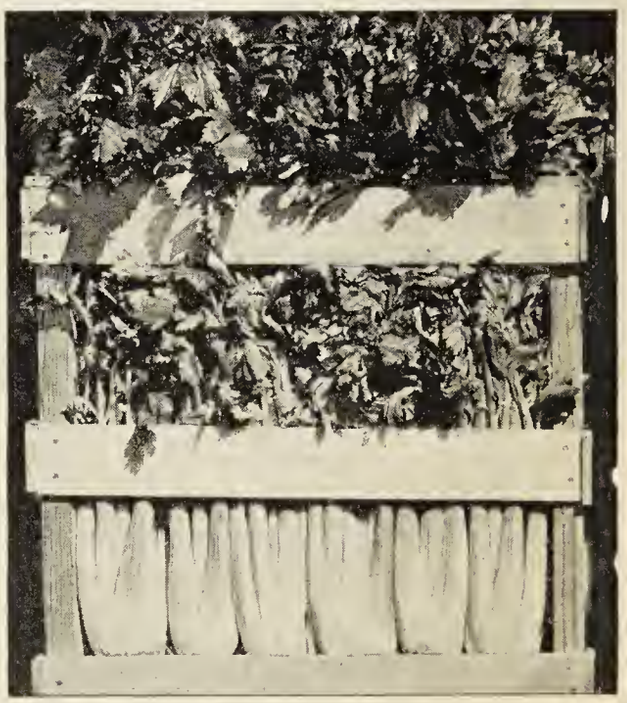
Pkt. 5c; ½oz. $1.00; oz. $1.50; ¼lb. $4.00; 1 lb. $15.

KILGORE'S WONDERFUL PEARL SPECIAL. (110 days.) This highly selected stock is very early, blanches quickly, and has been selected for large, full heart formation with very broad, thick, long ribs. Does not bolt to seed readily. The plants range from twenty to twenty-three inches over all. This is one of the best varieties of winter and early spring Celery of the Special or Golden Plume type for Florida, and one of the best early varieties for the North where large sizes of medium height are desired. Our stock is more resistant to hollow-stem, early seeding, and resists Celery diseases better than most stocks of the Special or Golden Plume type. It is an exceptionally heavy yielder of large sizes and one of the finest long-distance shippers.

Pkt. 5c; ½oz. 60c; oz. $1.00; ¼lb. $3.25; 1 lb. $12.00.

KILGORE'S PRIDE. (105 days.) The Kilgore Seed Company has spent a great deal of time, effort and expense in developing this stock of the Special or Golden Plume type of celery. It is very early in maturity, produces a vigorous growth, with broad, thick ribs, eight to ten inches to the first joint, ranging from 22 to 25 inches over all, making a very attractive pack. Unlike other strains of the Golden Plume or Wonderful type, Kilgore's Pride bleaches a little slower and does not go soft as quickly. It develops a good heavy heart, and is an exceedingly heavy yielder of good sizes, with large heavy butts. This is a good medium early variety for the North, and an excellent early winter and spring celery for Florida. One of the finest varieties of celery ever developed for Florida as well as northern celery growers. Has been developed and selected for resistance to premature seed stalk development.

Pkt. 5c; ½oz. $1.00; oz. $1.50; ¼lb. $4.00; 1 lb. $15.



Kilgore's Pride Celery—a Kilgore Development

No Vegetable requires more careful handling in seed production than celery. Kilgore's celery seed is not just grown, it is bred, selected and rogued with the best of care and attention under our personal supervision.

CUCUMBER

Plant 2 pounds per acre

CULTURE. Fall planting begins early in August and continues through September. Plant in rows 4 feet apart in hills 2 feet apart in the drill, dropping 6 to 8 seeds in each hill. It is desirable to treat cucumber seed with Semesan or some other good disinfectant before planting. Cucumbers are pollinated by either tame or wild bees. Under unfavorable conditions, or in isolated locations, it is always desirable to provide a strong hive of bees in cucumber fields in order to insure perfect pollination. The bees should not be placed in the field before the cucumbers begin to blossom in order to provide food for the bees so they will remain in the cucumber fields. Without proper pollination the cucumbers are deformed, or at least a large percentage of bottlenecks and nubbins are produced, and this is due entirely to lack of bees to facilitate proper pollination.

Prices quoted are postpaid.
Write for prices on larger quantities.

KILGORE'S NEW IMPROVED LONG DARK GREEN. Sold out. Available about December 1.

KILGORE'S BRED-RITE HENDERSON'S PERFECTED WHITE SPINE. (Dark green strain.) (48 days.) Our improved dark green strain of this popular variety is especially desirable for long distance shipping as it holds its dark green color long after reaching the market. Length, 7 to 8 inches. Early, of fine appearance, and very productive.

Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. $1.00.

GENUINE EARLIEST BLACK DIAMOND. (42 days.) This is an extremely early, very prolific variety of the white spine type of cucumber. The fruits average seven inches in length, are perfectly cylindrical in shape, smooth and of handsome appearance. Fruits are very dark green in color, holding this color long after they are harvested and on the market. An ideal type for long distance shipment.

Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. $1.00.

Kilgore's Improved Stays Green (Long Strain)

KILGORE'S IMPROVED STAYS GREEN *(Long Strain)*. (43 days.) Our improved long strain of Stays Green produces fruits of very dark green color from stem to blossom end, uniform in shape, and considerably longer than the old type of Kirby Stays Green, averaging about 8 inches in length. Our improved strain is very early, an enormous yielder, and a fine shipper.

Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. $1.00.

KILGORE'S BRED-RITE EARLY FORTUNE. (48 days.) Absolutely the finest strain of long, dark green Early Fortune in existence. Heavy yielder, splendid shape, 8½ to 10 inches long, slightly tapering toward both ends, fine quality, and a wonderful shipper.

Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 90c.

BABER'S EARLIGREEN (New Long Strain). (42 days.) This Kilgore development produces cucumbers desirable for pickling or slicing, the fruits being about 7 to 8 inches in length, well filled at the ends, and very dark green in color. It is exceedingly early, an enormous yielder and ideal for shipping.

Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 90c.

CORN---SWEET AND ROASTING EAR

Plant 1 peck per acre

CULTURE. For a fall crop of sweet or roasting ear corn, plant from August to October in rows three feet apart, one and one-half feet apart in the row, thinning to one or two plants in a place.

SWEET CORN VARIETIES

SUWANNEE SUGAR. (NEW) (75 days.) **¼ lb. 10c; 1 lb. 30c; 2 lbs. 55c, postpaid. Not prepaid, 11 lbs. (pk.) $1.75; 44 lbs. (bu.) $6.50.**

LONG ISLAND BEAUTY. (80 days.) **¼ lb. 10c; 1 lb. 25c; 2 lbs. 45c; postpaid. Not prepaid, 11 lbs. (pk.) $1.40; 44 lbs. (bu.) $5.00.**

STOWELL'S EVERGREEN. (75 days.) **¼ lb. 10c; 1 lb. 25c; 2 lbs. 45c; postpaid. Not prepaid, 11 lbs. (pk.) $1.40; 44 lbs. (bu.) $5.00.**

COUNTRY GENTLEMAN. (70 days.) **¼ lb. 10c; 1 lb. 25c; 2 lbs. 45c; postpaid. Not prepaid, 11 lbs. (pk.) $1.40; 44 lbs. (bu.) $5.00.**

GOLD BOND. (65 days.) **¼ lb. 10c; 1 lb. 25c; 2 lbs. 45c; postpaid. Not prepaid, 11 lbs. (pk.) $1.40; 44 lbs. (bu.) $5.00.**

GOLDEN GIANT. (70 days.) **¼ lb. 10c; 1 lb. 25c; 2 lbs. 45c; postpaid. Not prepaid, 11 lbs. (pk.) $1.40; 44 lbs. (bu.) $5.00.**

ROASTING EAR VARIETIES

GENUINE OKLAHOMA SILVERMINE. (82 days.) Sold out until November 1.

KILGORE'S DELICIOUS TRUCKER'S FAVORITE. (NEW.) (70 days.) **¼ lb. 10c; 1 lb. 25c; 2 lbs. 45c; postpaid. Not prepaid, 14 lbs. (pk.) $1.40; 56 lbs. (bu.) $5.00.**

TUXPAN. (85 days.) **¼ lb. 10c; 1 lb. 20c; 2 lbs. 35c; postpaid. Not prepaid, 14 lbs. (pk.) $1.00; 56 lbs. (bu.) $3.50.**

EARLY SNOWFLAKE. (80 days.) **¼ lb. 10c; 1 lb. 25c; 2 lbs. 45c; postpaid. Not prepaid, 14 lbs. (pk.) 85c; 56 lbs. (bu.) $3.00.**

EARLY WHITE DENT. (80 days.) **¼ lb. 10c; 1 lb. 20c; 2 lbs. 35c; postpaid. Not prepaid, 14 lbs. (pk.) 85c; 56 lbs. (bu.) $3.00.**

TRUCKER'S FAVORITE. (75 days.) **¼ lb. 10c; 1 lb. 20c; 2 lbs. 35c; postpaid. Not prepaid, 14 lbs. (pk.) $1.00; 56 lbs. (bu.) $3.50.**

NORFOLK MARKET. (68 days.) **¼ lb. 10c; 1 lb. 20c; 2 lbs. 35c; postpaid. Not prepaid, 14 lbs. (pk.) $1.00; 56 lbs. (bu.) $3.50.**

WHITE PEARL. (85 days.) **¼ lb. 10c; 1 lb. 20c; 2 lbs. 35c; postpaid. Not prepaid, 14 lbs. (pk.) $1.00; 56 lbs. (bu.) $3.50.**

EGGPLANT

Sow ¼ to ½ pound in seed-bed to plant an acre

CULTURE. For the fall crop, plant in June, July, and August, in muslin or burlap-covered seed-beds. When set in the open, the plants may need some protection from the sun. Many growers use palmetto fans, stuck slanting on the south side of the hill, which will keep the sun from striking the newly set out plants with full force. Have rows 5 feet apart and 3 fect between the plants. Use not less than a ton of high-grade fertilizer per acre. It is an excellent plan to spray with Pyrox every 10 days from the time the plants have four or five leaves, as there is no plant more subject to blight and insect attack. Pyrox controls fungous diseases and also kills worms. It is also advisable to dust eggplants regularly with sulphur or, better, to spray with Sulfocide, which controls red spider, a serious pest of eggplant. It is always desirable to treat eggplant seed with Semesan or some other good disinfectant before planting.

Prices quoted are postpaid.
Write for prices on larger quantities.

KILGORE'S BRED-RITE FT. MYERS MARKET. (120 days.) We have found this variety to be superior to all others in the fact that it produces immense yields of large sized fancy fruits over a long period. The fruits hold their large size and intense black color clear up to the top of the plants, thus producing a very large percentage of fancies. The plants are very resistant to blight and other diseases. The plants are of the high-bush type, producing a very tall, vigorous growth, bearing the fruit well off the ground. The fruits are long, cylindrical in shape, never producing a necky stem end, and they possess an intense deep black color so much in demand among buyers and in the markets.

Pkt. 5c; oz. 40c; ¼lb. $1.25; 1 lb. $4.50.

KILGORE'S BRED-RITE MANATEE SPECIAL. (115 days.) The plants of this variety are of high-bush character, being taller and more vigorous than Black Beauty and other low-bush sorts, although not quite so tall as the true Florida High-Bush. The fruits, on the other hand, are shorter and thicker than Florida High-Bush, oval in shape, and of a beautiful rich black color. The sturdy, vigorous bush holds the fruits well off the ground, thus preventing rot. Extremely early, hardy, and very productive.

Pkt. 5c; oz. 40c; ¼lb. $1.15; 1 lb. $4.00.

KILGORE'S BRED-RITE FLORIDA HIGH-BUSH. (125 days.) Sold out. Available about October 1.

KILGORE'S SPECIAL. (120 days.) A high-bush type with uniform, medium sized, round, black fruits. Well bred and very productive.

Pkt. 5c; oz. 35c; ¼lb. $1.00; 1 lb. $3.50.

NEW ORLEANS MARKET. (120 days.) Sold out. Available about October 1.

NEW YORK IMPROVED PURPLE *(Spineless).* (120 days. **Pkt. 5c; oz. 40c; ¼lb. $1.15; 1 lb. $4.00.**

BLACK BEAUTY. (115 days.)

Pkt. 5c; oz. 40c; ¼lb. $1.15; 1 lb. $4.00.

KALE or BORECOLE

Plant 1 ounce to 50 feet of row

CULTURE. Plant in Florida from August to March, in rows 2 feet apart, and for large plants thin to 20 inches apart in the row.

GREEN CURLED SCOTCH. Pkt. 5c; ¼lb. 25c; 1 lb. 75c, postpaid.

KOHL RABI

Plant 1 ounce to 50 feet of row

CULTURE. Plant in rows 1½ feet apart, thinning out to 6 inches apart in the rows. Start fall planting in August.

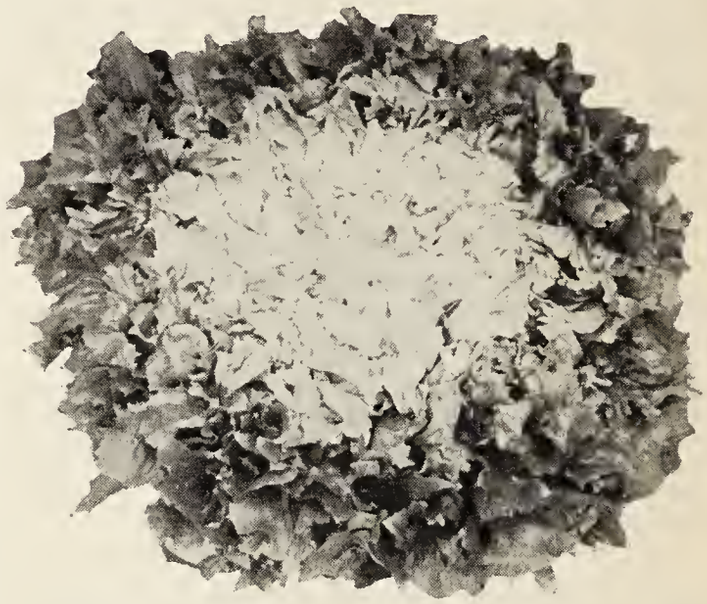
EARLY WHITE VIENNA. Pkt. 5c; oz. 25c; ¼lb. 60c; 1 lb. $2.00, postpaid.

ENDIVE

Sow ½ to 1 pound in seed-bed to plant an acre

CULTURE. Plant from August to February in seed-bed the same as lettuce. Set in field 20 inches apart and a foot apart in the row. Endive makes fine salad, is valuable for flavoring soups and stews, and for greens.

Prices quoted are postpaid.
Write for prices on larger quantities.



Kilgore's Improved Florida Deep Heart Escarolle

ESCAROLLE — KILGORE'S IMPROVED FLORIDA DEEP HEART. (70 days.) One of the very best and most profitable types to grow commercially. In great demand on northern markets, and well adapted to Florida soil and climatic conditions. The leaves are large, broad, thick, slightly crumpled, of medium green color, with thick, nearly white midribs. Our improved stock of this variety is of the full-heart type, developing an upright growth, producing a very heavy, thick, matted plant with large, deep, well-blanched hearts, which blanch to a creamy white. Our tests indicate this stock to be hardier than other full-heart strains, and to stand long-distance shipment better.

Pkt. 5c; oz. 15c; ¼lb. 40c; 1 lb. $1.25.

ESCAROLLE—BROAD LEAVED BATAVIAN. (75 days). This is a very good type of Endive. The plants are large and compact, developing a nicely blanched heart. Although the growth is not upright as with our "Deep Heart" strain it is better than most strains of this type on the market. Very hardy and a heavy yielding type.

Pkt. 5c; oz. 10c; ¼lb. 25c; 1 lb. 60c.

GREEN CURLED. Ruffec Strain (70 days.) A hardy, vigorous sort, with deep green, curled, finely cut leaves. The midrib is thick, broad, white, tender and fleshy. A dense mass of deeply divided leaves forms the head which blanches readily to a beautiful creamy white.

Pkt. 5c; oz. 15c; ¼lb. 30c; 1 lb. $1.00.

GARLIC

Garlic sets are planted the same as onion sets, in rows 12 to 20 inches apart, setting 3 to 6 inches apart in the row.

½lb. 20c; 1 lb. 35c, postpaid.

LETTUCE

Sow ½ to 1 pound in seed-bed to plant an acre, or plant 1 to 1½ lbs. per acre in field

Lettuce growers demand the best seed. Our seed is produced for us by one of the oldest and best lettuce seed growers in the United States, who makes a specialty of producing only the very highest type lettuce seed. Our lettuce seed is all tested for trueness to type in our Plant City, Florida proving grounds, so we are positive there is no mixture, and we make frequent germination tests, so we can be certain you will secure a good stand with Kilgore's Bred-Rite lettuce seed.

CULTURE. First sowings are made in Florida the beginning of September and continue until March. Low, damp soil is best suited for this crop. Lettuce must be grown rapidly in order to give it size, tenderness, crispness, and high edible quality. Therefore, the land must be highly fertilized and moist. In Florida from one to two tons per acre of 4-5-5 fertilizer is commonly used for this crop. Broadcast the seed on good moist beds that have been thoroughly prepared, or sow in rows six inches apart and use a light roller to press the seed into the soil. A pound of seed sown broadcast plants a bed three feet wide and a hundred yards long. Place burlap or well washed old fertilizer sacks over the beds until the seeds sprout. Old fertilizer sacks must be thoroughly washed out before using to prevent burning of seed sprouts. Be sure seed beds are kept thoroughly moist at all times after the seed is planted, and during warm dry weather the beds should be sprinkled twice daily with cool water in order to hasten and increase germination. In hot weather when it is difficult to get lettuce seed to germinate, germination may be hastened and improved by placing moistened lettuce seed in moist cloth in the icebox for several days before sowing, and then sowing in well moistened soil. In level culture lettuce plants are usually set 15 by 15 inches in the field. Plants should be watered as set in field.

Prices quoted are postpaid.
Write for prices on larger quantities.

KILGORE'S BRED-RITE NEW YORK NO. 515. (NEW.) (68 days.) This new strain of the New York or Iceberg type is the surest heading type we have found, and in our trials this year every plant made a good solid head, even during hot weather. This lettuce is a little earlier than New York No. 12, which it resembles in general appearance. We believe that this new strain will make an excellent companion crop to New York No. 12. The heads are large, solid, attractive; bright green in color and of excellent quality.

Pkt. 5c; oz. 20c; ¼lb. 60c; 1 lb. $2.00.

Kilgore's Bred-Rite New York No. 515

A new development, producing firm, solid heads similar to western-grown Iceberg.

KILGORE'S BRED-RITE NEW YORK NO. 12. (70 days.) New York No. 12 has been especially developed to withstand the heat and high humidity common to Florida and the southeastern states. Our tests indicate that this strain when grown on well prepared soil in Florida will develop large, very solid, crisp heads just as good as any Iceberg type lettuce grown in the west. This type is growing in demand on the northern markets. For best results, this variety should be grown more slowly, with less ammonia fertilizer, and with less soil moisture toward maturity, than is required by Big Boston and other varieties of lettuce. It should be planted to mature in cool weather. This lettuce should be shipped and marketed in western lettuce crates, not in hampers.

Pkt. 5c; oz. 20c; ¼lb. 50c; 1 lb. $1.75.

KILGORE'S BRED-RITE BIG BOSTON. (70 days.) This Bred-Rite strain is the finest and truest type of Big Boston it is possible to secure anywhere. Our trials each year indicate it to be absolutely free of mixture. The heads are of cabbage or butter-head type, large-sized, broad, slightly spreading, globular, with a broad shoulder at the base. The outer leaves are broad, almost smooth, but wavy at the edge, medium light green with a tinge of brown on the margins of the outer leaves. It is early and hardy and stands shipping very well. The heads are brittle, buttery, and the interior is a beautiful golden yellow color.

Pkt. 5c; oz. 15c; ¼lb. 30c; 1 lb. $1.00.

KILGORE'S IMPROVED WHITE BOSTON. (68 days.) Similar to our Bred-Rite Big Boston, although a trifle earlier and slightly lighter shade of green without the brownish tinge at the borders of the outer leaves. Our improved strain has been developed to produce large-sized heads similar to Big Boston. Its bright green market appearance, with freedom of red tinge on the leaves, is making this improved strain very popular as a shipping sort.

Pkt. 5c; oz. 15c; ¼lb. 45c; 1 lb. $1.50.

ICEBERG. (74 days.) A very popular variety of the crisp-heading type. Produces large, very firm, hard, well-blanched, globular heads. This variety does not bolt to seed as readily as other sorts. The leaves are very broad, thick, quite blistered and crumpled, with finely frilled borders, and are of medium green color, with faint brown tracing on the extreme borders. Head is pure white inside, very hard, brittle, very sweet, and of ideal quality.

Pkt. 5c; oz. 15c; ¼lb. 40c; 1 lb. $1.25.

ROMAINE (WHITE PARIS COS OR TRIANON COS). (70 days.) This variety forms a large, medium green, well-folded head with blunt top, and when properly grown it is very sweet, crisp, mild, and of fine quality. Grows very erect and compact. The leaves are long, narrow, thick, and smooth, with broad, thick midribs.

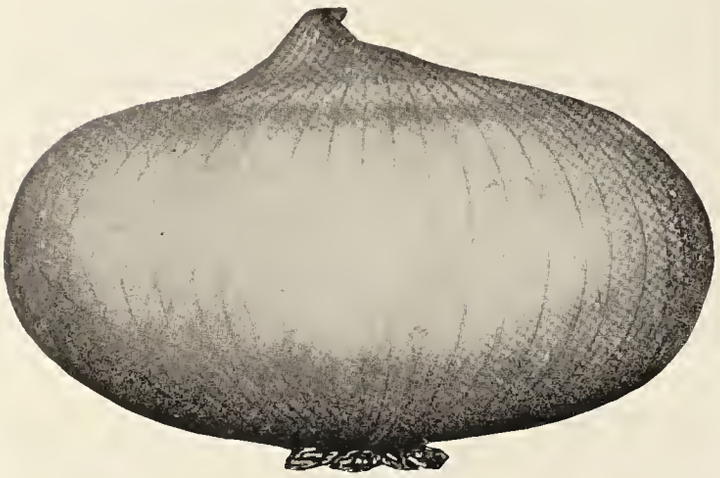
Pkt. 5c; oz. 15c; ¼lb. 40c; 1 lb. $1.25.

BLACK-SEEDED SIMPSON. (60 days.) The best large, very early, non-heading or leaf variety. It will do well when it is too warm to grow the heading sorts. The leaves are very broad, much blistered and crumpled, and excessively frilled on the borders, light yellowish green in color, never brownish, very tender, of fine and delicate texture, and of excellent quality.

Pkt. 5c; oz. 15c; ¼lb. 30c; 1 lb. $1.00.

ONION

Sow 3 pounds in seed-bed to plant an acre, or plant 5 pounds per acre in field



Crystal Wax Bermuda Onion

CULTURE. First plantings are made the first of September and continued until March. October and November are the best months to plant. In Florida the seed is generally planted in the open field, where the onions are to grow, in rows 15 inches apart, and when 4 to 5 inches high they are thinned out to 3 to 4 inches apart in the drill. Those taken out can be used to transplant any possible skips. Onion seed can also be planted in seed-beds and transplanted to the field later. This is a safe and sure method, and is becoming very popular in Florida. Transplanting generally produces less splits and more first grade onions.

Prices quoted are postpaid.
Write for prices on larger quantities.

LARGE DOMESTIC SWEET SPANISH. ***(Riverside Strain.)*** This is a domestic grown strain of the Sweet Spanish with the general characteristics of the imported strain but not as well bred, nor as well adapted to Florida conditions.

Pkt. 5c; oz. 25c; ¼lb. 75c; 1 lb. $2.50.

CRYSTAL WAX BERMUDA. ***(Teneriffe Grown.)*** Early maturing, flat in shape, of beautiful waxy white color, exceedingly attractive in appearance.

Pkt. 5c; oz. 30c; ¼lb. 85c; 1 lb. $2.75.

YELLOW BERMUDA. ***(Teneriffe Grown.)*** We have a superior strain of this standard variety, especially adapted to Florida conditions. Bulbs of light straw-yellow color, of medium size, flat, early in maturity. Flesh is very mild and sweet.

Pkt. 5c; oz. 25c; ¼lb. 75c; 1 lb. $2.50.

KILGORE'S EARLIEST EXPRESS GLOBE. (NEW.) This new onion is much earlier than the Sweet Spanish, which it somewhat resembles in shape, color and quality. It matures even carlier than the Bermudas. Bulbs are of light brown or cream color, globe or top-shaped, slightly tapering toward the root, of medium size, with pure white flesh. Exceedingly mild in flavor with a very sweet taste. Quite resistant to thrips. This is the earliest maturing onion for Florida and the South.

Pkt. 5c; oz. 35c; ¼lb. 85c; 1 lb. $3.00.

LOUISIANA RED CREOLE. Exceptionally well adapted to Florida, very productive, of large, solid, semi-globe shaped Onions of reddish color. Strong in flavor, but one of the very best keepers.

Pkt. 5c; oz. 25c; ¼lb. 75c; 1 lb. $2.50.

AUSTRALIAN BROWN. We have the true Buckskin strain, noted for its exceptional keeping qualities. Bulbs are of medium size, semi-globe shaped, very firm and solid, and the skin is very thick and chestnut brown in color. Rather strong in flavor, but a wonderful keeper in warm climates.

Pkt. 5c; oz. 20c; ¼lb. 60c; 1 lb. $2.00.

KILGORE'S NEW LONG WHITE BUNCHING. This new onion has been developed especially to satisfy the demand for a variety that develops long white green onions of attractive appearance when bunched, and of mild sweet quality. This varicty makes a very long stem, nearly twice as large as ordinary bunching onions, pure white in color, and without the slightest trace of a bulb. These onions grow in clusters, 3 to 5 onions being on one plant.

Pkt. 5c; oz. 30c; ¼lb. 85c; 1 lb. $3.00.

ONION SETS

Plant 6 to 8 bushels of Sets per acre. One bushel weighs 32 pounds

Set out in rows 1½ feet apart and 2 to 3 inches apart in the row. Plant from September to March.

Onion Set prices are F. O. B. Plant City, except quarts or less, which are prepaid.

YELLOW BERMUDA. Pt. 25c; qt. 40c; pk. $1.25; bu. $4.00.

CRYSTAL WAX BERMUDA. Pt. 25c; qt. 40c; pk. $1.25; bu. $4.00.

WHITE SILVERSKIN. Pt. 25c; qt.: 40c; pk. $1.15; bu. $3.75.

YELLOW DANVERS. Pt. 25c; qt. 40c; pk. $1.15; bu. $3.75.

MUSTARD

Plant 4 pounds per acre
Good Green Food for Your Poultry as Well as for Table Use.

CULTURE. Mustard will come in quicker than any other sort of "greens." Plant from June to March in good, rich garden soil in rows 16 to 18 inches apart.

Prices quoted are postpaid.
Write for prices on larger quantities.

SOUTHERN GIANT CURLED. (60 days.) A very popularlar variety because of its vigorous growth of large, light green, attractive appearing curly leaves which are of crisp tender texture.

Pkt. 5c; ¼lb. 15c; 1 lb. 50c.

KILGORE'S FLORIDA BROAD-LEAF. (60 days.) Plants are tall and upright, producing considerable more leaf-growth than other varieties. This variety stays in condition without bolting to seed longer than other sorts, which make it a valuable sort for planting in Florida.

Pkt. 5c; ¼lb. 15c; 1 lb. 50c.

TENDERGREEN JAPANESE MUSTARD SPINACH. (30 days.) A very quick growing, mild mustard, with a spinach flavor. Remains tender even in hot dry weather. The large oblong leaves are very dark green in color, very smooth, with small white mid-ribs. Very slow to bolt to seed. It ships well, and the demand is growing.

Pkt. 5c; ¼lb. 20c; 1 lb. 60c.

CHINESE SMOOTH-LEAF. (60 days.) **Pkt. 5c; ¼lb. 15c; 1 lb. 50c.**

FORDHOOK FANCY. (60 days.) **Pkt. 5c; ¼lb. 15c; 1 lb. 50c.**

OKRA

Plant 8 pounds per acre

CULTURE. Okra can be planted any time from February until September. Okra is a warm weather plant and will not grow well unless planted when the ground is warm. Plant in rows 2½ to 3 feet apart and sow thinly in the drill. When 3 to 4 inches high, thin out to one stalk every 10 to 15 inches. Okra should be cut every second day. If this is not done some of the pods become too hard and the young plants will stop bearing pods.

Prices quoted are postpaid.

Write for prices on larger quantities.

KILGORE'S BRED-RITE PERKINS LONG GREEN. (42 days.) This is a very heavy producer, extremely early, and a sure money-maker when grown for market. The pods are long—frequently 9 to 10 inches—straight, slender, pointed, intense dark green, and they retain their tenderness and color longer than any other sort. The plants which range from 5 to 6 feet in height, are literally covered with pods from the ground up.

Pkt. 5c; ¼lb. 20c; 1 lb. 50c.

KILGORE'S LOW-BEARING LONG GREEN. (45 days.) Sold out. Available December 1.

WHITE VELVET. (45 days.) Plants 3½ feet high, very productive. Pods are round, long, averaging 7 inches, smooth, tender and of nearly white color.

Pkt. 5c; ¼lb. 20c; 1 lb. 50c.

CUBAN. (45 days.) Plants range 5 to 6 feet high, extremely productive of short (3 to 4 inches long) thick, perfectly straight and uniform pods, rather light green in color. A good shipper and keeper. Withstands poor growing conditions, especially wet soil and heavy rains, better than other varieties.

Pkt. 5c; ¼lb. 25c; 1 lb. 75c.

LADY FINGER. (45 days.) Plants range 5 to 6 feet high, extremely productive of small, straight, slender, uniform, dark green pods. Smaller and more slender than Perkins.

Pkt. 5c; ¼lb. 25c; 1 lb. 75c.

ENGLISH or GARDEN PEAS

Plant 1 bushel per acre in single rows;
1½ bushels per acre in double rows

Our pea seed is strictly first class, high germinating, disease-free, western-grown stock, and our different varieties are absolutely true to type, being tested in our Plant City, Florida, proving grounds.

CULTURE. English Peas are very hardy and are not commonly attacked by insects. Frost does not hurt them, except while in blossom, and then only that part of the crop in bloom; they will put on another crop immediately. If frost destroys the bloom it is a good idea to give the plants an application of Nitrate of Soda, at the rate of 200 pounds per acre. Peas can be grown on almost any kind of soil and with about the same cultivation as beans. Sowing in double rows is a good plan, as they will support each other. Have rows 4 feet apart and drop peas 1 to 2 inches apart in the row. Use a high-grade fertilizer at the rate of 1,000 to 1,800 pounds per acre.

All prices quoted on peas are postpaid.
Write for prices on larger quantities.

Little Marvel Peas
A typical plant showing the great prolificness of this variety.

LITTLE MARVEL. (50 days.) A very desirable early variety especially adapted to Florida muck soils. The vines are vigorous, growing about 1½ feet tall, and are loaded with straight, round, very dark green pods, square at the bottom end, and about 3 inches long. Our stock is uniformly true to type and very productive.

¼lb. 10c; 1 lb. 30c; 2 lbs. 50c.

KILGORE'S WINNER. (52 days.) This is absolutely the finest early pea for Florida sandy loam soils, and in cool seasons is also adapted to Florida muck soils. As it is a very early, exceedingly large-podded variety, it is in great demand on northern markets. The plants are vigorous in growth, 18 to 22 inches in height, with heavy vine and foliage, producing a great abundance of very large, dark green, straight pods, containing large, dark green peas of unsurpassed quality.

¼lb. 10c; 1 lb. 35c; 2 lbs. 60c.

KILGORE'S IMPROVED DWARF TELEPHONE. (60 days.) A large podded, highly productive sort, resistant to Fusarium Wilt disease. Vines are light green, stocky and bunchy. Pods single and double, medium light green, slightly curved, broad, pointed and very attractive, containing eight to ten peas of excellent quality. Our strain is unsurpassed in size and appearance of pods.

¼lb. 10c; 1 lb. 35c; 2 lbs. 60c.

THOMAS LAXTON. (55 days.) **¼lb. 10c; 1 lbs. 30c; 2 lbs. 50c.**

LAXTONIAN. (55 days.) **¼lb. 10c; 1 lb. 30c; 2 lbs. 50c.**

LAXTON'S PROGRESS. (55 days.) **¼lb. 10c; 1 lb. 30c; 2 lbs. 50c.**

PEPPER

Sow ½ to 1 pound in seed-bed to plant an acre

Kilgore's Improved Ruby Giant Pepper

We have specialized in pepper seed for many years, and we challenge any one to furnish better pepper seed for Florida and the South.

Peppers are among the best-paying Florida truck crops, and the harvest season is so long that even though the crop comes in on a poor market, the chances are that the market will have time to strengthen before they are nearly through fruiting, which certainly gives them more latitude for a paying crop than almost any other vegetable.

Hammock or muck land, or rather moist soil, is best suited for this crop, although any medium-good soil, properly fertilized, will grow good Peppers.

CULTURE. Plants are started in seed-beds. In Manatee County and other sections of Florida, peppers, like eggplants, are started in cloth-covered beds. For a fall crop, sow the seed in June, July, and August; for a long-season winter crop on the East Coast, plant in September and October. For an early spring crop in Manatee County and other West Coast sections sow in November.

Peppers are much more hardy than eggplants. However, it takes a very high temperature to germinate either seed, and it is usually very difficult to get a stand when the ground is wet or cold. Make rows 3 feet apart and set plants 20 inches apart in the row. Inasmuch as this crop is in bearing so long, it is most profitable to make several applications of fertilizer, using 400 pounds to an acre every twenty days until at least a ton has been used.

Kilgore's Bred-Rite Pepper seed has given the best results for many years in Florida. Our stocks are selected for early maturity, high yield, and trueness to type, and are thoroughly tested in our Plant City, Florida, proving grounds.

Pyrox is the very best spray for pepper plants, as it will stick perfectly to the smooth foliage. We recommend its use regularly to control rust and other diseases. *It is desirable to treat pepper seed with Semesan or some other good disinfectant before planting.*

Prices quoted are postpaid,
Write for prices on larger quantities.

KILGORE'S IMPROVED RUBY GIANT. (115 days.) Plant grows tall and upright, and is of very vigorous growth, being somewhat more disease-resistant and withstanding poor growing conditions better than most varieties of this type. The fruits are somewhat similar to World Beater in shape, being large, four-lobed, and very attractive in appearance. Our strain of this variety is extremely productive and bears over a long period.

Pkt. 5c; oz. 40c; ¼lb. $1.15; 1 lb. $4.00.

KILGORE'S COLOSSAL RUBY KING. (110 days.) This improved strain of the Ruby King variety replaces our Bred-Rite Ruby King and possesses all the good characteristics of the standard variety, but produces larger sized and somewhat thicker meated fruits. Fruits average 5 to 6 inches in length and 3 to 4 inches in width, with sweet, mild and exceptionally thick flesh. This new strain has been thoroughly tested in different sections of Florida and is becoming very popular due to the large size and excellent shipping quality of the fruits.

Pkt. 5c; oz. 40c; ¼lb. $1.15; 1 lb. $4.00.

CALIFORNIA WONDER. (125 days.) This is a thick-fleshed variety, slightly later than Florida Giant and with shorter, more blocky fruits, averaging 4½ inches long and 4 inches in diameter. This variety is growing in popularity because of its good shipping qualities.

Pkt. 5c; oz. 45c; ¼lb. $1.40; 1 lb. $5.00.

KILGORE'S IMPROVED COLOSSAL. (110 days.) This is an improved stock of Colossal pepper. The plant is upright in growth, very hardy and produces a heavy crop of large fruits over a much longer period than other strains. The fruits are very large, thick fleshed, sweet, three and four-pronged, and average slightly longer than the World Beater.

Pkt. 5c; oz. 35c; ¼lb. $1.00; 1 lb. $3.50.

KILGORE'S BRED-RITE FLORIDA GIANT. (120 days.) Sold out. Available about November 1.

KILGORE'S BRED-RITE WORLD BEATER. (115 days.) Sold out. Available about September 15.

ANAHEIM CHILI *(Hot).* (120 days.) A popular, hot, pungent variety. The fruits are very meaty, measuring 6 to 7 inches in length and 1 to 1½ inches in diameter at stem end, and are green, ripening to a bright red. Often dried for winter use. Plants are exceedingly prolific.

Pkt. 5c; oz. 45c; ¼lb. $1.40; 1 lb. $5.00.

PARSLEY

Plant 1 ounce to 150 feet of row, or 3 pounds per acre

CULTURE. Parsley can be planted in the fall or spring, in drills 16 inches apart. This seed is very hard to germinate and it often takes from two to three weeks to produce a satisfactory stand.

DOUBLE MOSS CURLED. (90 days.) **Pkt. 5c; ¼lb. 25c; 1 lb. 75c; postpaid.**

KILGORE'S SEED POTATOES

For Fall Planting. Not Prepaid.

Plant 600 pounds per acre in 3 to 4 foot rows

Fine potatoes can be grown in the Fall, but we do not recommend them as a money-making shipping crop, as they would come in competition with the northern crop just being harvested at that time. However, fall planting is all right to produce a crop for local market.

Plant in drills 3 to 4 feet apart, dropping a seed every 15 inches in the row. Use from 1000 to 2000 pounds of good vegetable or Potato Special fertilizer. A 4-7-5 fertilizer mixture is a good standard for potatoes. Plant from the latter part of August until October 15.

For early fall planting it is desirable to use small potatoes and plant whole, as it is next to an absolute impossibility to get the seed up if it is cut; therefore, do not cut the seed for August, September, and early October planting. In the early fall, during hot weather, plant seed 5 to 6 inches deep.

We will have limited quantities of the small, well-matured Red Bliss stock for August, September, and early October planting. Write for prices.

We will be able to furnish the new crop of well-matured, regular line of northern grown seed potatoes early in October, or just as early as possible to secure sufficiently well-matured stock that is safe to cut and make early plantings. Bred-Rite (Packed in 100-lb. crates), State Certified and Selected potatoes in 100-lb. bags of Red Bliss variety available early in October. Write for prices.

PARSNIP

Plant 1 ounce to 150 feet of row

CULTURE. Parsnips do best on deep, rich, sandy soil. Sow seed in Florida from September to December, in rows 1½ to 2 feet apart; cover with one-half inch of soil. When plants are well up, thin to 6 inches apart in the row. Parsnip seed germinates very slowly.

IMPROVED HOLLOW CROWN. (120 days.) **Pkt. 5c; oz. 20c; ¼ lb. 60c.**

RHUBARB or PIE PLANT

Sow 3 to 4 lbs. in seed-beds for an acre of plants, or plant 5 to 6 lbs. per acre in field

CULTURE. Plant in the Fall in rows 3 to 4 feet apart and thin to about 18 inches in the row. Rhubarb does best in well-drained fertile soil, rich in humus, and is especially well adapted to well-drained muck soil.

LINNAEUS. (125 days.) This variety produces thick, fleshy stalks of the best quality and flavor.
Pkt. 5c; oz. 20c; ¼ lb. 50c; 1 lb. $1.75; postpaid.

SAGE

A very popular garden herb for the South. It is used in flavoring or seasoning and is said to have medicinal properties. Leaves should be cut as plant blooms, and should be dried quickly in the shade. It is a perennial plant, and may be divided for a crop the second year.

Pkt. 5c; oz. 25c; postpaid.

RADISH

Plant 4 pounds per acre, or 1 ounce to 50 feet of row

CULTURE. Plant in rows 12 to 15 inches apart and thin to 2 inches in the row. For best results, a rich, loose, moist, sandy loam soil is best. Radishes must be grown rapidly to be of the best quality.

Our radish seed stocks are produced each year from carefully selected, transplanted roots.

Prices quoted are postpaid.
Write for prices on larger quantities.

Kilgore's Bred-Rite Early Scarlet Globe Radish
Unsurpassed in Color and Uniformity

KILGORE'S BRED-RITE EARLY SCARLET GLOBE. (21 days.) A perfected stock of this extra early variety. The roots are of good size, globe to olive-shaped, with a very small top. They are always crisp and tender, of uniformly bright scarlet color. In great demand in all markets.
Pkt. 5c; ¼ lb. 25c; 1 lb. 75c.

SCARLET TURNIP WHITE-TIPPED. (21 days.) **Pkt. 5c; ¼ lb. 25c; 1 lb. 75c.**

LONG WHITE ICICLE. (23 days.) **Pkt. 5c; ¼ lb. 25c; 1 lb. 75c.**

LONG SCARLET SHORT TOP OR CINCINNATI MARKET. (25 days.) **Pkt. 5c; ¼ lb. 25c; 1 lb. 75c.**

SALSIFY

Plant 1 ounce to 50 feet of row

Drill seed in rows 1½ feet apart, and when 4 inches high thin out, leaving plants 4 to 6 inches apart. Salsify succeeds best in rich, deep, sandy soil. Plant in Florida from October to March.

MAMMOTH SANDWICH ISLAND. (120 days.) **Pkt. 5c; oz. 20c; postpaid.**

SQUASH

Plant 2 pounds per acre of bush varieties and 1 pound per acre of running varieties.

CULTURE. Squashes can be grown on almost any kind of soil. Use from 800 to 1,200 pounds of fertilizer per acre.

For bush varieties, have rows 4 feet apart and hills 2 feet apart in the row. Running varieties should be planted at least 8 by 8 feet apart. Put six to eight seeds in each hill, and thin out to two plants when 3 inches high. Plant in fall, from August until October.

Prices quoted are postpaid.
Write for prices on larger quantities.

BUSH VARIETIES

EARLY YELLOW SUMMER CROOKNECK. (48 days.) This is a very popular variety of the Yellow Crookneck type. It is similar to Giant Crookneck except in size and earliness. The fruit is smaller, with a thinner neck, and matures slightly earlier.

Pkt. 5c; ¼ lb. 30c; 1 lb. 90c.

GIANT YELLOW SUMMER CROOKNECK. (50 days.) As the name implies, the fruits are large, with a rather thick neck. The vines grow vigorously, but are not as prolific as the Early Yellow Summer Crookneck.

Pkt. 5c; ¼ lb. 30c; 1 lb. 90c.

GIANT YELLOW SUMMER STRAIGHTNECK (50 days.) Similar to Giant Yellow Summer Crookneck, except with a straight instead of a curved neck.

Pkt. 5c; ¼ lb. 30c; 1 lb. 90c.

MAMMOTH WHITE BUSH. ***(Patty Pan type.)*** (50 days.) Larger than Early White Bush but not quite as prolific.

Pkt. 5c; ¼ lb. 30c; 1 lb. 90c.

Giant Yellow Summer Straightneck

EARLY WHITE BUSH. ***(Patty Pan type.)*** (48 days.) This is a very popular type of squash for shipment to northern markets. The fruits are flat but deep, with scalloped edges and measure about 8 inches across by 3 inches through.

Pkt. 5c; ¼ lb. 30c; 1 lb. 90c.

WOOD'S EARLIEST PROLIFIC. ***(Patty Pan type.)*** (42 days.) Earliest of the Patty Pan type and probably the earliest of all squash varieties. Extremely prolific, producing round, smooth, deep, thick fruits, not scalloped, and of a silver-gray color.

Pkt. 5c; ¼ lb. 30c; 1 lb. 90c.

COCOZELLE. ***(Long Slender Italian Vegetable Marrow.)*** (50 days.) The fruit is 10 to 12 inches long, slender, 1 to 1½ inches in diameter, cylindrical in shape, dark green in color. Our stock of this variety produces a small, bushy, open type of plant, with small, deeply cleft leaves, but with an immense yield of uniformly true to type fruits.

Pkt. 5c; ¼ lb. 35c; 1 lb. $1.15.

ZUCCHINI. ***(Short Thick Italian Vegetable Marrow.)*** (50 days.) This variety of the Italian Vegetable Marrow type produces fruit rather short and blocky ranging from 7 to 9 inches in length, light green in color, mottled with gray, giving the fruits a greenish-gray appearance.

Pkt. 5c; ¼ lb. 30c; 1 lb. $1.00.

BLACK ZUCCHINI. (50 days.) An improved strain of short, thick, Italian Vegetable Marrow. Fruits similar in shape and size to regular Zucchini, but with a very dark green almost black color. Our stock in uniformly true to type.

Pkt. 5c; ¼ lb. 40c; 1 lb. $1.25.

RUNNING VARIETIES

GREEN HUBBARD. (110 days.) Very productive and vigorous. The fruits are large and oval, and the dark green, warted rind is very thick, so that the fruits will keep over long periods in storage. Its orange flesh is very fine and sweet, making it excellent for pies and baking.

Pkt. 5c; ¼ lb. 40c; 1 lb. $1.25.

BOSTON MARROW. (110 days.) A running variety with vines very sturdy and prolific. The fruit is shaped very much like the Hubbard, but is of light lemon-yellow color. Its flesh is very sweet and fine-grained, making it very good for cooking. The tough rind makes it a good keeper and a good shipper.

Pkt. 5c; ¼ lb. 40c; 1 lb. $1.25.

SPINACH

Prices quoted are postpaid.
Write for prices on larger quantities.

CULTURE FOR BLOOMSDALE SPINACH. Successful for fall and winter planting. Does not grow well in hot weather. Plant seed in rows 16 to 20 inches apart and thin to 4 to 6 inches apart in the row. May be planted broadcast, thinning plants to stand about 10 by 10 inches apart. Plant 1 oz. of seed per hundred feet of row or 12 to 15 lbs. per acre in rows, or 20 to 25 lbs. broadcast.

BLOOMSDALE. (35 days.) Our re-selected strain of this variety is the very best obtainable; disease-resistant, early, and hardy. The plant is of rapid, upright growth, with very thick, glossy, dark green leaves of medium size, pointed but quite broad and crumpled or blistered. This is the best winter variety and a great favorite with southern shippers.

Pkt. 5c; ¼ lb. 15c; 1 lb. 50c.

CULTURE FOR NEW ZEALAND SPINACH. As seeds are very hard and germinate with difficulty, soak them in warm water for twenty-four hours to hasten germination. Plant seed in rows two feet apart, and drop three or four seeds per hill about 20 inches apart in the row. Plant three to four pounds of seed per acre.

NEW ZEALAND. (55 days.) Entirely distinct from the true Spinach. The plant is tall and very spreading, with numerous side shoots. It grows to a height of 1 foot and spreads to a radius of 2 feet. Leaves are very thick, light green, rather small, broad and pointed. It grows well in hot weather and under adverse conditions, and is sometimes called "Summer" or "Hot-weather Spinach." The leafy tips of the branches are removed and new growth follows, making possible many cuttings. New Zealand Spinach should be planted in every Florida garden.

Pkt. 5c; ¼ lb. 25c; 1 lb. 75c.

TOMATO

Sow ¼ pound in seed-bed to plant an acre, or plant ½ pound per acre in field

Prices quoted are postpaid.
Write for prices on larger quantities.

CULTURE. Tomatoes will do well on almost all kinds of soil, from a sand-bed to a muck-pond. To start with, the land should be put in good condition, and, after thoroughly turning it, the addition of one-half to a ton of hardwood ashes, broadcast and harrowed in, will give fine returns. Then lay off rows 4 to 5 feet apart, open a furrow, and drill in 1200 pounds of high-grade fertilizer and mix thoroughly with the soil. It is good policy to let this stand for 7 to 10 days, and then you are ready to put in your seed or set the plants. The seed should not be covered more than an inch deep. Plants should be 6 to 8 inches high and put in the ground nearly up to the bud, 1½ feet apart in the row, or 12 inches in the row if staked.

Along the East Coast, first plantings are begun during July and continued until in December. North and Central Florida begin planting the latter part of December and continue to middle of February. For fall crop, plantings are made in July, August, and September.

KILGORE'S BRED-RITE MARGLOBE. (98 days.) By field-tests throughout the East Coast, Manatee County, and all tomato-growing sections of the State, Kilgore's Bred-Rite Marglobe has proved to be the best and most desirable type for Florida growers. This is due, apparently, to several reasons; namely, it is more free of navel and large blossom-end scars; the ridging at the stem end is practically eliminated, which means smoother and more fancy fruit, as this ridging usually produces growth-cracks and ill-shaped fruit. The fruits ripen to a beautiful deep scarlet-red color.

Pkt. 5c; ½oz. 25c; oz. 40c; ¼lb. $1.25; 1 lb. $4.50.

KILGORE'S EXTRA-SELECTED GLOBE. (92 days.) This is one of the earliest Globe strains which has been especially developed for Florida growing conditions. Its smooth, perfectly globe-shaped fruits mature perfectly, do not crack, and ripen to a beautiful deep pink color. Being a strong, vigorous, uniform grower, it is one of the heaviest producers of high-quality fruit that will bring top prices.

Pkt. 5c; ½oz. 25c; oz. 40c; ¼lb. $1.25; 1 lb. $4.50.

KILGORE'S CROWN-SELECTED GLOBE. (90 days.) The seed fruits of this variety are picked with great care as to perfect shapes and perfect development, taking only the crown setting, and, in many cases, only one or two tomatoes from a plant. After the seed has been dried, it is given special warehousing and screening to make sample of uniform, large-sized seeds, which is necessary for a uniform lot of plants in the seed-beds and fields. This is a very expensive, tedious, laborious task, but it results in greater vitality, quicker and more uniform germination of seed, luxuriant plant-growth, and abundant production of fancy fruit of unsurpassed quality.

Pkt. 5c; ½oz. 35c; oz. 60c; ¼lb. $2.00; 1 lb. $7.50.

PRITCHARD OR SCARLET TOPPER. (90 days.) The Pritchard was developed by crossing Marglobe with Cooper's Special Self-Topper. It combines the good qualities of both parent varieties. Vines medium dense, compact, erect, self-topping. Fruits mature very early, a week to ten days earlier than Marglobe, are large, smooth, meaty, globular in shape and ripen uniformly to a very deep attractive red color, both exterior and interior. This variety is an enormous producer and therefore requires rich or liberally fertilized moist soil.

Pkt. 5c; ½oz. 25c; oz. 40c; ¼lb. $1.25; 1 lb. $4.50.

Kilgore's Improved Grothen Red Globe Tomato

KILGORE'S IMPROVED GROTHEN RED GLOBE. (NEW.) (87 days.) This is a new, very early maturing, high yielding variety well adapted to old tomato land. The plants are of open growth, with rather small foliage, requiring rich, deep moist land for best results, maturing fruits from 10 to 14 days earlier than Marglobe, ripening to a beautiful red color. A very heavy producer of smooth, globe-shaped, large fruits, sizing up good clear to the top of the plants, producing a very high percentage of fancies. The fruits are firm and solid and the interior ripens up slowly, making this variety an exceptionally good shipper. Exceedingly high yields of large fruits, of excellent shipping quality are the main factors recommending this new variety.

Pkt. 5c; ½oz. 30c; oz. 50c; ¼lb. $1.50; 1 lb. $5.50.

KILGORE'S IMPROVED GLOVEL. (NEW.) (92 days.) This new variety of shipping tomato is the result of a cross between Globe and Marvel, having the same parentage as Marglobe. The vine growth is vigorous and decidedly more open than Marglobe, making it easy to spray and to pick the fruit. The fruit is of deep globe shape, large, firm, smooth, and notably free from growth cracks, and ripens to a pink color. Tested at the Homestead, Fla. Experiment Station during the last four seasons, Glovel has consistently outyielded other standard commercial varieties and maintains its large size in successive pickings. It is highly resistant to Fusarium wilt and to nailhead rust. This variety should be given a trial by every Florida Tomato Grower.

Pkt. 5c; ½oz. 30c; oz. 55c; ¼lb. $1.65; 1 lb. $6.00.

KILGORE'S BRED-RITE COOPER'S SPECIAL SELF-TOPPER. (92 days.) This is a very heavy producer of extremely early globe-shaped fruits. We have made special selections to increase the size and the percentage of fancy fruits. The plants are hardy and are loaded with fine, solid fruits.

Pkt. 5c; ½oz. 25c; oz. 40c; ¼lb. $1.15; 1 lb. $4.00.

TOMATO (Continued)

KILGORE'S BRED-RITE BRYAN'S SELF-TOPPER. (90 days.) Plants set fruit very heavily in clusters at every joint to the tip end of the vines. Bryan Self-Topper fruit is of pink color, large, solid, smooth, globe-shaped, and with a very small seed cavity.

Pkt. 5c; ½oz. 25c; oz. 40c; ¼lb. $1.25; 1 lb. $4.50.

KILGORE'S SPECIAL. (90 days.) Produces large, smooth fancy fruits of a perfect deep globe shape. They are extremely dark green in color and ripen uniformly to a beautiful deep scarlet. The outstanding feature of this variety is the hardness and firmness of the fruit and its resistance to puffiness, making it the finest shipping variety in existence.

Pkt. 5c; ½oz. 20c; oz. 30c; ¼lb. 85c; 1 lb. $3.00.

KILGORE'S NEW FLORIGLOBE. (95 days.) This is a wilt-resistant, pink Marglobe. Our strain of this has been especially developed for uniformity, freedom from cracking, smoothness at the stem end, and for a deep globe shape. The plant is a very heavy cropper of large sized, fancy fruits, which ripen to a deep pink.

Pkt. 5c; ½oz. 25c; oz. 45c; ¼lb. $1.40; 1 lb. $5.00.

CLARK'S EARLY. (85 days.) This variety is exceedingly popular in Texas. It is an early maturing, semi-globe shaped tomato, very smooth, firm, and of large size, ripening to a beautiful deep red color.

Pkt. 5c; ½oz. 20c; oz. 35c; ¼lb. $1.00; 1 lb. $3.50.

REDFIELD BEAUTY. (92 days.) Vine bears over a long season. Fruits are of globe shape, ripen to a beautiful deep purple, very firm and meaty. Fruit resists rotting even under the most trying conditions. A most desirable tomato for southern gardens.

Pkt. 5c; ½oz. 20c; oz. 35c; ¼lb. $1.00; 1 lb. $3.50.

BREAK O'DAY. (90 days.) It produces heavy crops of large, smooth, globular, meaty, red fruits. The Break O'Day is resistant to wilt and nail-head rust. The plants are rather weak and spreading in growth.

Pkt. 5c; ½oz. 25c; oz. 40c; ¼lb. $1.15; 1 lb. $4.00.

LIVINGSTON'S GLOBE, IMPROVED. (95 days.) This is an improved strain of the old Livingston's Globe variety which variety has been popular throughout the Gulf States for many years. Our improved strain is very productive of fancy, perfectly globe-shaped fruits, and the fruits hold their large size and globe-shape until the last pickings.

Pkt. 5c; ½oz. 20c; oz. 35c; ¼lb. $1.00; 1 lb. $3.50.

OXHEART. (90 days.) The Oxheart is large, smooth, thick, tender and almost seedless. The color is pink. Rich soil adds greatly to its productiveness. This is an ideal variety for the home garden and for the local market.

Pkt. 5c; ½oz. 35c; oz. 60c; ¼lb. $2.00; 1 lb. $7.50.

GULF STATE MARKET. (92 days.) **Pkt. 5c; ½oz. 20c; oz. 35c; ¼lb. $1.00; 1 lb. $3.50.**

JUNE PINK. (88 days.) **Pkt. 5c; ½oz. 20c; oz. 35c; ¼lb. $1.00; 1 lb. $3.50.**

JOHN BAER. (92 days.) **Pkt. 5c; ½oz. 20c; oz. 30c; ¼lb. 85c; 1 lb. $3.00.**

PONDEROSA. ***(Brimmer.)*** (110 days.) **Pkt. 5c; ½oz. 30c; oz. 55c; ¼lb. $1.65; 1 lb. $6.00.**

TURNIP AND RUTABAGA

Plant 2 to 3 pounds per acre

We list only the types that are best suited to Florida and Southern growing conditions. CULTURE. Plant in rows 1½ feet apart. Thin early, because any overcrowding will result in rough, slow growing, poorly flavored roots. Turnips can be planted and grown every month of the year in Florida. Rutabagas are best grown as a late fall and winter crop. For best quality grow turnips rapidly.

Prices quoted are postpaid.

Write for prices on larger quantities.

KILGORE'S TOKYO MARKET. (35 days.) Extremely early in maturity producing very beautiful, attractive, pure white, globe-shaped roots. Foliage grows upright and is louse resistant. Roots of exceptionally fine quality and of exceedingly attractive appearance.

Pkt. 5c; ¼lb. 20c; 1 lb. 60c.

KILGORE'S EARLY FLORIDA. (35 days.) Our seed of this extremely early strain is grown from special hand selected and transplanted roots. Roots of medium size, flat and white with a bright purple top, and mature extremely early.

Pkt. 5c; ¼lb. 20c; 1 lb. 60c.

EARLY WHITE FLAT DUTCH. (42 days.) A very early, flat, pure white, smooth turnip of medium size.

Pkt. 5c; ¼lb. 15c; 1 lb. 40c.

EARLY WHITE EGG. (45 days.) An early, oval or egg-shaped variety with clear white roots of medium size.

Pkt. 5c; ¼lb. 15c; 1 lb. 40c.

JAPANESE FOLIAGE TURNIP. ***(Shogoin or Louse Resistant.)*** (50 days.) This turnip resists heat, dry weather and lice. Produces an immense yield of upright growing foliage. Roots are pure white, semi-globe shape. Grown largely for the tops which are extremely large, thick, very succulent, tender and of mild turnip flavor.

Pkt. 5c; ¼lb. 20c; 1 lb. 60c.

PURPLE TOP WHITE GLOBE. (50 days.) Roots almost perfect globe-shaped, flesh and skin white, with a purple or red color above ground. Our strain of this standard variety is especially well bred, uniform and true to type. This variety is grown most extensively in the South for shipment.

Pkt. 5c; ¼lb. 15c; 1 lb. 40c.

KILGORE'S EARLIEST WHITE FLAT. (42 days.) Produces very delicate, smooth, high quality foliage for greens, and matures roots considerably earlier than Japanese Foliage turnip. The foliage grows upright making it louse resistant and easy to clean for greens, root is pure white in color, flat in shape, and develops very early. Grown for both foliage and roots.

Pkt. 5c; ¼lb. 20c; 1 lb. 60c.

WHITE GLOBE. (44 days.) A handsome, pure white, very large, perfectly round turnip. Closely resembles Purple Top White Globe except for color.

Pkt. 5c; ¼lb. 15c; 1 lb. 40c.

AMERICAN IMPROVED RUTABAGA. (90 days.) The smooth roots attain a much larger size than turnips, are almost globular but slightly oblong, pale yellow with a purple top and with a very small neck. Flesh is yellow, solid and tender. For table use and stock feeding.

Pkt. 5c; ¼lb. 20c; 1 lb. 50c.

GRASS AND FIELD SEED

We are not bound for any definite time by the prices quoted in this Catalog. All prices are subject to change without notice. We recommend that you order as early as possible. Our field seeds are recleaned, well-bagged, and of highest quality stocks.

ALL GRASS SEED PRICES QUOTED ARE F. O. B. PLANT CITY, EXCEPT 10-LB LOTS OR LESS, WHICH ARE PREPAID

BERMUDA GRASS

Sow 25 to 100 pounds per acre

Seed can be sown from March to November, and should be mixed with fine soil when sowing to get a good even distribution. For pasture, use 25 pounds per acre; for lawns or golf courses, where a heavy thick sod is desired, use ¼ pound per 100 square feet or 100 pounds per acre. Bermuda makes a beautiful velvety, permanent lawn where plenty of water is available and proper care given. When Bermuda turns brown in late fall and winter, give it a good application of sheep manure at the rate of 5 pounds per 100 square feet, or 1 ton to acre, and ½ pound Italian Rye Grass per 100 square feet, or 200 pounds to acre, broadcasting both seed and sheep manure right on top of Bermuda, with no cultivation, but plenty of water. This will give a beautiful green lawn throughout winter and spring.

1 lb. 35c; 10 lbs. $2.80; 25 lbs. $6.50; 100 lbs. $25.00.

KILGORE'S HULLED BERMUDA

Sow 1 to 2 pounds to each 1,000 square feet of lawn

This is the highest grade Bermuda grass seed. Formerly thought impossible, the hard, almost water-tight hulls of the seed are removed. This revolutionizes Bermuda lawn planting because of the quick, sure results it produces, the seed germinating in a week with proper moisture conditions.

1 lb. 50c; 10 lbs. $4.10; 25 lbs. $9.75; 100 lbs. $38.00.

CARPET GRASS

Sow 25 to 100 pounds per acre

Plant in fall from October to December, and in spring from March to June. For pasture use 25 pounds of seed per acre broadcast. Carpet Grass is desirable for lawns and golf courses, and for this purpose use ¼ pound for 100 square feet, or 100 pounds per acre. Carpet Grass, like practically all other grasses, thrives where plenty of moisture is available and the richer the soil the better. The more mowing, trampling and grazing it has, the better it likes it and the better the lawn.

1 lb. 25c; 10 lbs. $1.80; 25 lbs. $4.00; 100 lbs. $15.00.

ITALIAN RYE GRASS
FLORIDA'S BLUE GRASS

Sow 50 to 200 pounds per acre

This is a very valuable and desirable fall and winter grass for Florida, but not permanent, giving way as soon as warm weather comes on; however, for quickly grown beautiful green lawns, golf greens, and fairways it cannot be excelled. Planted earlier part of October it will be ready for the mower in three to four weeks, and will make vigorous, luxuriant growth throughout fall and winter and well up into late spring. Do not plant before October 1 and later than March. For lawn or golf-course work, plant ½ pound seed per 100 square feet, or 200 pounds per acre. This will give good, heavy, thick sod. For grazing or hay, plant at rate of 50 pounds per acre.

1 lb. 15c; 10 lbs. $1.00; 25 lbs. $2.00; 100 lbs. $7.00.

CENTIPEDE GRASS

Use 1 bushel of sprigs per 600 square feet

This variety of lawn grass has become very popular in the last few years. It forms a very heavy sod, choking out even bermuda grass and sand spurs. It never needs weeding and is very easy to mow. This grass is practically disease-free and needs only light applications of fertilizer twice a year.

When planting prepare the soil and fertilize carefully. This grass is planted by sprigs, 3 to 5 inches long, in rows 12 inches apart, and 3 to 4 inches apart in the rows. Insert the sprigs in the ground, leaving about ½ to 1 inch showing. Do not cover them entirely. For the first few months the lawn will need careful watering and some fertilizer. Some weeding may be necessary before the lawn is well established.

1 bu. $1.25; 5 bu. $5.50; 10 bu. $9.50
Shipped only by express. Not prepaid.

BITTER BLUE-STEMMED ST. AUGUSTINE GRASS
(Chinch Bug Resistant)

Use 1 bushel of sprigs per 800 square feet

This new strain of St. Augustine grass has been proven to be a better grass in every way than the old variety of St. Augustine. It is a stronger grower, is much tougher, holds its color in cold weather, has a longer and stronger root system, so will stand more dry weather. The joints are close, and the runners grow flat on the ground. It does well in shaded places. It has been planted in many chinch bug infested lawns on the lower east coast of Florida and has proven to be extremely chinch bug resistant. The sprigs should be planted in well prepared soil, setting about twelve inches apart each way.

Bushel $2.50. Shipped only by express. Not prepaid.

BAHIA GRASS

Sow 15 to 20 pounds per acre for pasture

Bahia grass is a perennial pasture grass spreading by stolons (surface runners) and seed. Bahia grass seed can be planted any month in the year. Seed should be planted broadcast on well prepared ground. The grass has short, thick stolons, and spreads slowly, but the root system is large and once a sod is formed few other plants are able to encroach on it. It does best on productive soils, but will make a good sod on poorer, drier soils.

1 lb. 40c; 10 lbs. $3.30; 25 lbs. $7.75; 100 lbs. $30.00.

RYE

Sow 1 peck in drills; broadcast 1 bushel per acre

Rye can be planted from September to January, but October, November, and December are the best months in which to plant. If you wish to cut and feed green instead of grazing it, plant in drills, 3 feet apart, using a peck of seed per acre, but where planted broadcast, it will take 1 bushel to seed an acre.

ABRUZZI. During the last few seasons this variety has been planted very extensively and has proven to be one of the very best for Florida. Strictly a southern-grown variety, producing a heavier tonnage of green feed and grain than other types. Grows tall and upright, and is an early and a heavy yielder.

1 lb. 15c; 2 lbs. 25c; postpaid. Not prepaid, 14 lbs. (pk.) 70c; 56 lbs. (bu.) $2.25.

FLORIDA BLACK RYE. A standard upright, tall growing variety and a type that always gives satisfactory results in Florida. Northern or western varieties of rye have a tendency to fall over on the ground and are not suitable for grazing or cutting in Florida. Florida Black and Abruzzi are tall, upright growing varieties and both are ready for grazing in six to eight weeks.

1 lb. 20c; 2 lbs. 35c; postpaid. Not prepaid, 14 lbs. (pk.) 75c; 56 lbs. (bu.) $2.50.

OATS

Sow 1½ to 2 bushels per acre
A bushel weighs 32 pounds

If planted in drills, make them 1½ feet apart and cover seed 2 to 3 inches deep. If the seed is broadcast, put them in with a tooth harow. The best time to plant oats in Florida is October and November. However, the Burt, or 90-Day, can be planted as late as January.

COKER 33-50 (New, Smut Resistant) (115 days.) This year for the first time we are able to offer Coker's strain 33-50 Smut Resistant oats. The yield of these oats is much heavier than Fulghum. As these oats stool much more than the Fulghum, it is not desirable to plant more than one and one-half bushels seed per acre, for heavier seeding may crowd the plants too much for best results. The plant is strong, sturdy, about 80% as tall as Fulghum. Makes a quick, early growth, with short, broad, dark green, erect blades. Straw is stiff and storm resistant. Grain is large, red, practically beardless.

1 lb. 15c; 2 lbs. 25c; postpaid. Not prepaid, 8 lbs. (pk.) 45c; 32 lbs. (bu.) $1.25.

FULGHUM. (110 days.) This is one of the South's very best. Although later than Burt, it is a far heavier yielder, and is rust-proof, entirely beardless and drought-resistant.

1 lb. 10c; 2 lbs. 15c; postpaid. Not prepaid, 8 lbs. (pk.) 35c; 32 lbs. (bu.) $1.00.

BURT. (90-Day.) (90 to 100 days.) Quick maturing and one of Florida's most popular oats. It is a sure cropper, and can be planted later than any other variety.

1 lb. 15c; 2 lbs. 25c; 8 lbs. (pk.) 45c; 32 lbs. (bu.) $1.25.

WINTER TURF. (Grazing) (130 days.) Splendid for pasturing; looks more like rye while growing. Severe cold never seems to affect this variety. One of the best for grazing.

1 lb. 15c; 2 lbs. 25c; postpaid. Not prepaid, 8 lbs. (pk.) 50c; 32 lbs. (bu.) $1.35.

DWARF ESSEX RAPE

Sow 4 pounds in drills or 8 pounds broadcast per acre

F. O. B. Plant City, except 10-lb. lots or less, which are postpaid

Rape can be grown on a variety of soils, ranging from a sand-bed to a muck pond. Rape is not suitable as a dry forage, but for pasture or green feed there is nothing better, producing green feed from October until April. It is best sown in drills 4 feet apart. Rape can be sown from September to March. After cutting or grazing off it keeps coming out again. For hogs, sheep, and cattle, Rape is a great fat-producer.

Pkt. 10c; 1 lb. 25c; 10 lbs. $1.30; 100 lbs. $10.00.

SUNFLOWER

Sow 6 pounds per acre

F. O. B. Plant City, except 10-lb. lots or less, which are postpaid

MAMMOTH RUSSIAN. Plant from March to September. Sow 6 pounds of seed per acre in drills 3 feet apart and hills 1 foot apart in the drill, thinning out to one stalk in the hill when 4 to 6 inches high.

1 lb. 20c; 10 lbs. $1.50; 25 lbs. $3.00; 100 lbs. $11.00.

Suggestions For The Home Flower-Garden

Many of our friends, while interested primarily in vegetables, will also appreciate the desirability of beautifying the home surroundings by the planting of appropriate flowers. Make Florida more beautiful. Do it with flowers. We recommend the following varieties, all priced:

Pkt. 10c; 3 pkts. 25c, postpaid.

For a complete list of Flowers, Rose Bushes, Lawn Grass, Rock Garden and Fish Pool Supplies, and complete cultural directions for planting and fertilizing flowers and lawns, we refer you to our "FLOWER PLANTING GUIDE FOR THE SOUTH" which may be obtained free of charge through any of Kilgore's twelve Florida stores or by writing The Kilgore Seed Company, Plant City, Florida.

ROSE BUSHES

Plant December, January, February, and March.

TO BE SURE OF SECURING VARIETIES DESIRED, ORDERS SHOULD BE SENT EARLY.

Rose Bushes cannot be shipped before December 1. When ordering rose bushes, state time delivery is wanted.

Our rose bushes are the very finest, healthy, sturdy, budded, acclimated stock, all Florida grown, and therefore accustomed to climatic conditions of Florida.

All our roses are strong, field grown, and are budded on Rosa Multiflora stock. We carry a large assortment of different colors and varieties of both bush and climbing roses. For complete list of varieties see "Kilgore's Flower Planting Guide for the South" or write us.

All orders will be shipped direct from the nursery.

Prices of all varieties of Roses—Postpaid.

FRUIT AND NUT TREES

Figs, Grapes, Peaches, Pears, Paper Shell Pecans, Plums and Japanese Persimmons.

We carry a complete line of fruit and nut trees of varieties best adapted to Florida and the southeast. Our fruit and nut trees are the very best, most dependable, budded, result-producing stocks.

Orders are taken for delivery between December 1 and March 15. As the supply of the most desirable varieties frequently becomes exhausted early in the season, it will behoove our friends to order early, stating when delivery is wanted.

All orders will be shipped direct from the nursery.

For complete list of varieties and prices see Kilgore's spring 1936 catalog, or write the Kilgore Seed Company, Plant City, Florida.

INSECTICIDES and FUNGICIDES

A new ruling permits the mailing of all insecticides except Cyanogas and Bi-Sulphide of Carbon. When ordering, please allow enough extra for postage as all prices quoted are f. o. b. Plant City or any Kilgore store, unless otherwise indicated.

It is worse than false economy to try to grow a truck crop without the use of insecticides and fungicides. The successful growers know the importance of this very essential feature in producing paying truck crops.

ARSENATE OF LEAD POWDER. 1 lb. 20c; 4 lbs. 60c.

BI-SULPHIDE OF CARBON. Best thing known for ridding grains of weevils, and excellent for killing ants, grasshoppers, etc., and for destroying vermin. Sold in gallon cans only. **Per gallon $2.00. (Not mailable.)**

BLUESTONE (COPPER SULPHATE). CRYSTALS: 4 lbs. 30c; 10 lbs. 70c; 25 lbs. $1.50; 100 lbs. $5.50. SNOWFORM: 4 lbs. 40c; 10 lbs. 80c; 25 lbs. $1.60; 100 lbs. $5.75. Write for special prices on barrel or ton lots.

CALCIUM ARSENATE. (BOWKER'S CALCIDE). 1 lb. 15c; 4 lbs. 40c.

CARBOLINEUM OR PROTEXOL. A wonderful insecticide and germicide for many uses. Preserves wood against rot and doubles its life. In gallon cans, **$1.75 per gallon.**

COOPER'S CATTLE DIP. This is the only real, effective Cattle Dip on the market. Equally effective when sprayed or dipped. **Qt. 75c; gal. $2.25.**

COPPER-LIME DUST (BORDEAUX). 20-80. 5 lbs. 60c; 10 lbs. 90c; 25 lbs. $1.80; 50 lbs. $2.60; 100 lbs. $4.15.

COPPER-LIME CALCIUM ARSENATE DUST. 20-20-60. 5 lbs. 70c; 10 lbs. $1.10; 25 lbs. $2.15; 50 lbs. $3.35; 100 lbs. $5.65.

CUPROCIDE. For treatment of lima bean seed. Use at rate of 4 oz. to 1 bu. seed when planted on muck or heavy soils to prevent rotting of seed and to insure a good stand. Not recommended for light, sandy soils. **4 oz. 35c; 1 lb. 90c; 5 lbs. $4.00.**

CYANOGAS A-DUST. Deadly to rodent and insect pests. For best results, use a small hand duster to force the Cyanogas deep enough in the burrows to make a complete kill. **4 oz. 30c; ½-lb. tins 45c; 1-lb. tins 75c; 5-lb. tins $3.00; 25-lb. tins $10.00; 100-lb. drums $25.00. (Not mailable.)**

CYANOGAS—ANT KILLER. Instantly and permanently kills ant colonies in lawns, gardens and yards, before ants get into the home. **4 oz. can 30c.**

DIXIE KILLER. Exterminates rats, mice, roaches, water bugs, land crabs, cut worms and other destroyers of food and property. **2 oz. 25c; 1 lb. 60c; 3 lbs. $1.50.**

DUSTING SULPHUR WITH SPREADER. 5 lbs. 30c; 10 lbs. 45c; 25 lbs. $1.00; 50 lbs. $1.50; 100 lbs. $2.75.

FISH-OIL SOAP. Used largely for white-fly, mites, San Jose scale, thrip, and various other sucking insects. It is harmless to tender foliage. Use from 5 to 10 lbs. Fish-Oil to 50 gallons of water. **1 lb. 25c; 8 lbs. 80c; 16 lbs. $1.50; 50 lbs. $3.25.**

FLOWERS OF SULPHUR. 100 per cent pure Sulphur. **Lb. 10c; 10 lbs. 65c; 25 lbs. $1.25; 50 lbs. $2.25; 100 lbs. $4.00.**

KALO SPRAY. Non-arsenical spray for chewing insects. **½lb. 35c; 4 lbs. 90c; 50-lb. bag $10.00.**

KALOIL. A contact spray for sucking insects. **1½ oz. 35c; 6 oz. $1.00; 32 oz. $3.50; 1 gal. $11.75.**

KAYSO (a spreader). 2 lbs. 40c; 48 lbs. $8.30.

KILGORE'S FLY AND MOSQUITO SPRAY. A stainless liquid insecticide especially for household use. It kills roaches, bedbugs, ants, moths, mosquitoes and flies. **½ pt. 20c; pt. 35c; qt. 50c; gal. $1.50.**

LIME-SULPHUR SOLUTION. (32 to 34 degrees Baume.) **1-gal. can 35c; 5 gals. $1.50.** Write for special price on half-barrel and barrel lots or more.

MAGIKIL JELLY ANT BAIT. Kills ants and is harmless to plants. **Indoor tube, 10c; Garden size, 35c; Estate tube, 85c; 5-lb. can, $9.50.**

3% NICOTINE DUST. 5 lbs. 85c; 10 lbs. $1.45; 25 lbs. $3.25; 50 lbs. $5.45; 100 lbs. $9.90.

NICOTROL. Nicotine Sulphate with spreader. **Qt. $1.25; Gal. $2.75; 5 gal. drum $10.50.**

PARIS GREEN. Best grade. **¼lb. 15c; ½lb. 25c; 1 lb. 40c; 5 lbs. $1.65; 10 lbs. $3.20; 100 lbs. $29.00.**

PENETROL. A free flowing spreader. **Qt. 75c; gal. $1.75; 5-gal. drum $6.75.**

POISON BAIT. Prepared, ready for use to control mole crickets and cut worms. **100-lb. bags $4.50 each.**

POWDERED BORDEAUX. Bluestone and lime in the proper proportion to make up Bordeaux Spray. Add water according to directions. **1 lb. 25c; 4 lbs. 65c; 48 lbs. $6.72.**

PYRETHRUM POWDER. Kills bedbugs, ants and roaches. **1 lb. 30c; 10 lbs. $2.70; 25 lbs. $6.50; 50 lbs. $13.00; 100 lbs. $25.00; bbls. (225 lbs.) 24c per lb.**

SULPHUR (Agricultural). 1 lb. 6c; 10 lbs. 40c; 25 lbs. 85c; 100 lbs. $2.50; ton, $47.00.

TERRO ANT KILLER. Will rid your place of ants in twenty-four hours. **Small size bottle 25c; large size bottle 50c.**

TOBACCO DUST. High-grade strong snuff, not the ground stems usually sold which are absolutely useless as an insecticide. **1 lb. 8c; 10 lbs. 55c; 25 lbs. $1.10; 100 lbs. $3.75.**

TWINE (Jute). Soft vegetable tying twine, excellent quality. Used for tying tomato plants and bunching vegetables. **Lb. 25c; 50-lb. reels $18.00.**

Prices quoted are F.O.B. Plant City and all stores.

RED ARROW INSECT SPRAY

Makes a perfect solution, harmless to foliage, non-poisonous to human, animal, or poultry life, safe and easy to use for all kinds of insects. **Prices quoted are postpaid.**

1-oz. bottle makes 4 to 8 gallons. **Price 35c.**
¼-pint can makes 20 to 35 gallons. **Price $1.00.**
1-pint can makes 70 to 140 gallons. **Price $2.50.**
1-quart can makes 140 to 280 gallons. **Price $4.00.**
1-gallon can makes 560 to 1100 gallons. **Price $12.00.**

NEW EVERGREEN

Evergreen is non-poisonous to humans, birds, or pets. Its killing agent is pyrethrum which has the unusual quality of being fatal to plant insects, but harmless to higher forms of life. **1 oz. 35c; 6 ozs. $1.00; 16 ozs. $2.00; 1 gal. $12.00. Prepaid.**

SULFOCIDE AND SCALECIDE

For Spraying Vegetables and Citrus Trees.

SULFOCIDE. Unexcelled as a vegetable spray. Controls mildew, rust and anthracnose on beans. Also used in the washing water before shipping beans to control diseases while in transit. **Pt. 55c; qt. 90c; gal. $2.50; 5 gals. $8.10.**

SCALECIDE. Excellent for citrus. Combined with Sulfocide at the rate of two gallons Scalecide and one gallon Sulfocide to two hundred gallons of water, it takes care of practically all citrus troubles. **Qt. 70c; gal. $1.70; 5 gals. $6.05; 10 gals. $10.45.**

Write for descriptive pamphlets on Sulfocide and Scalecide.

BLACK LEAF 40

The Standard Contact Insecticide

For the control of aphis, thrips, leaf-hoppers, and other soft-bodied sucking insects. Useful for all vegetables, citrus and ornamentals. Also valuable painted undiluted on top of poultry roosts to control body lice, and as a spray against poultry lice. **Price: 1 oz. 35c; 5 oz. $1.00; 1 lb. $2.25; 2 lbs. $3.25; 5 lbs. $5.85; 10 lbs. $10.60, prepaid.**

PYROX

For Easier and Better Spraying. Not Prepaid

Pyrox Without Poison: Affords complete protection against blight and other fungous diseases. **100-lb. drum $8.50; 500-lb. barrel $30.00.**

Pyrox: Contains poison to kill leaf-chewing insects, also protects against blight and other fungous diseases. **25 lbs. $5.00; 50 lbs. $7.25; 100 lbs. $12.50; 300 lbs. $30.00.**

Nicotine Pyrox: A complete spray which kills both leaf-chewing insects and sucking insects, as well as prevents blight and other foliage diseases. Valuable for use in the home vegetable and flower garden. **10 ozs. 50c; 5 lbs. $1.75; 10 lbs. $3.00.**

SPRAYERS

ALL PRICES QUOTED ON SPRAYERS AND DUSTERS ARE PREPAID.
We Carry a Complete Line of Repair Parts for All Sprayers Listed. Write for Prices.

Vermorel Knapsack Sprayer

The Vermorel Sprayer does not have to be placed on the ground while pumping is done. A 40-pound pressure is maintained by an occasional stroke of the lever, which is placed at the right hand side of the spray tank. The tank is eliptical in shape and concave on one side, which allows it to fit snugly against the back. It is supported by two leather straps, which distribute the weight evenly over both shoulders, thus allowing the operator free use of both hands while spraying.

Brass Tank—3½ Gallons Capacity. Price $18.00.

The Champion Sprayer

A high pressure sprayer with an outstanding nozzle, adjustable for all types of spraying. Easy to operate and of very simple construction, having only a few parts that ever need replacement. The pump is heavy, well-constructed and efficient, having the agitator attached. A very economical and efficient sprayer for commercial growers.

Brass Tank, 5 Gallons Capacity, $16.50.

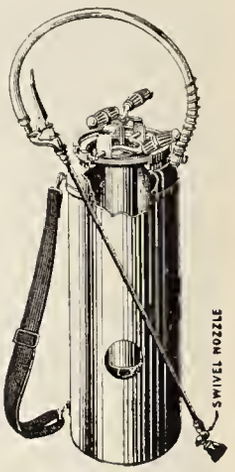
Brown's Compressed Air Sprayers

For spraying small trees, all manner of truck, and handling disinfectants of every description.

Brown's New Open-Hed Sprayer is electrically welded and galvanized after being fabricated. This makes a tank lining having no seams. Equipped with 5-ply special spray hose, automatic shut-off, seamless brass extension swivel nozzle coupling and screen, non-clog nozzle.

Open-Hed No. 4B, Brass Tank, 4 gallons capacity **$8.90**

Open-Hed No. 4D, Galvanized Tank, 4 gallons capacity **$5.60**



HAND SPRAYERS and DUSTERS

CONTINUOUS HAND SPRAYER. One of the best Hand Sprayers made. There is a continuous mist or spray from the time you start the pump until some seconds after it is stopped. Has two nozzle tips. Holds 1 quart. **Price $1.00.**

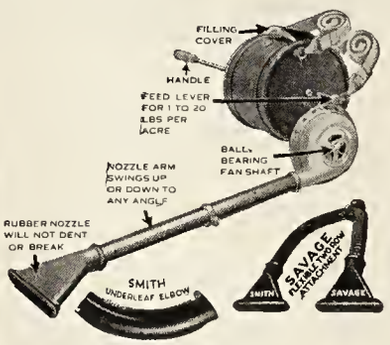
FEENY HAND DUSTER No. BX. Efficient, durable, and easy to operate and reload. Equipped with extension tubes and special nozzles for dusting upward from underneath plants and vines, and is recognized as the standard dusting outfit for applying all kinds of powdered insecticides in fields, vineyards, and gardens. Holds 1 pint. **Price $1.10.**

FEENY MODEL D. Holds two quarts. **Price $2.65.**

NEW MISTY HAND SPRAYER. This is a splendid and serviceable Sprayer. Lock seamed can. Made of heavy tin. Holds 1 quart. **Price 50c.**

Vermorel "Double Action" Duster, Capacity 12 lbs.	**$15.00**
California Beauty Duster, Capacity 12 lbs.	**14.00**
Blue Beauty Duster, Capacity 15 lbs.	**17.00**
American Beauty Duster, Capacity 15 lbs.	**20.00**

Savage Duster



FILLING COVER

SAVAGE

Handles everything in powder form. No brushes or wipers, free running and easy cranking. Bronze and steel gears packed in grease, and sealed in gear case, never require attention. Fan shaft runs on ball bearings. This duster will last for years. Holds 7 to 10 lbs. of dust.

No. 18-D Savage Duster, complete with under leaf elbow $19.00

No. 19-D Two-Row Attachment for Duster $3.25

MISCELLANEOUS FARM AND GARDEN TOOLS

Cyclone Seeder

The automatic feed adjustment gives a positive force feed and is quickly adjusted for different seeds. Flow can be started or stopped instantly by the touch of a lever. Seed cannot clog or rush. No waste of seed. Made for any kind of grain or grass seed which can be sown broadcast, such as alfalfa, alsike, barley, beggarweed, buckwheat, corn, clover, cowpeas, millet, oats, peas, rape, rye, soy beans, sorghum, turnips, vetches, wheat. One man seeds several acres per hour. **Price $2.50 postpaid.**

Orange Clippers—*Prices quoted are postpaid*

WISS. Lasts the longest and does the best work. The blades are especially curved, with smooth points and edges, and they will not bruise the fruit. **$1.00 each, $10.00 per doz.**

Raffia—*Prices quoted are postpaid.*

The plain or natural color comes in one pound hanks. **Lb. 40c; 10 lbs. $3.50; 100 lbs. $32.00.**

Plain natural color uneven weight hanks, **100 lbs. $26.50.**

Raffia Needles, small or large, **2 for 5c.**

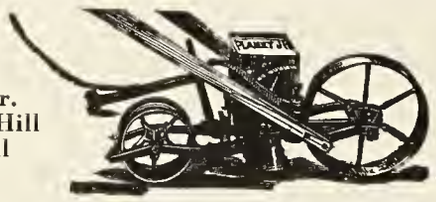
PLANET JR. TOOLS

SAVE WORK AND MONEY

All Prices Quoted on Planet Jr. Tools are F.O.B. Plant City, or F.O.B. any Kilgore Store.

Kilgore's Bred-Rite Seeds, the best that money can buy, will not give you best results unless you give the plants grown from them the proper care. Send for the complete Planet Jr. catalog.

Planet Jr. No. 4D Hill and Drill Seeder



Shipping Weight 41 lbs.

Price $13.50

F.O.B. Plant City and all stores

A favorite with large and small gardeners for over 40 years. Easily adjustable to sow either in drills or in hills 4, 6, 8, 12 or 24 inches apart. Instantly adjustable for any size seed opening. Shuts off automatically at the end of the row.

No. 119 Planet Jr. Garden Plow

The No. 119 with its 24-inch wheel is particularly suited to use in rough or very soft ground. The equipment included is all that is needed in most gardens. The single cultivator tooth is for making narrow furrows, marking out rows or for mixing fertilizer in the bottom of a seed furrow. The reversible scuffle blade attachment is for weeding, or reversed, for cultivating. The plow is for hilling, furrowing or light plowing. No. 35 Seeder fits the No. 119 Garden Plow. Shipping weight 18 lbs. **Price $3.65.**

No. 220 Planet Jr. Fertilizer Distributor

Designed particularly for Florida, the No. 220 is an economical and efficient fertilizer distributor. It can be adjusted to spread fertilizer evenly on the ground from four to thirty inches wide. The quantity of fertilizer to be distributed can be accurately regulated from 200 to 2,000 pounds per acre. The hopper capacity is one bushel. Shipping weight 115 pounds. **Price $26.00.**

No. 17 Planet Jr. Single Wheel Hoe

Planet Jr. Single Wheel hoes have all steel frames, and a fifteen inch steel wheel. They are practically indestructible. The No. 17 is the most popular for home garden use including the three essential attachments: hoe, cultivator teeth and plow. Shipping weight 22 lbs. **Price $7.35.**

No. 19 Planet Jr. Garden Plow and Cultivator

Equipped with one two-inch cultivator tooth, one 10-inch sweep, and one plow. Shipping weight 18 lbs. **Price $4.75.**

No. 11 Planet Jr. Double and Single Wheel Hoe

Shipping weight 37 lbs. **Price $13.00.**

No. 4 Planet Jr. Combined Hill and Drill Seeder, Wheel Hoe, Cultivator and Plow

Shipping weight 50 lbs. **Price $16.75.**

CANNING DEPARTMENT

LIVE AT HOME AND BEAT HARD TIMES!
BUILD A BANK ACCOUNT WITH TIN CANS!

Hardly is there a day in Florida when there is not some luscious vegetable or fruit that can easily be conserved for later use. Meats, poultry and fish can also be conserved by modern, safe and scientific methods—the same methods as used by commercial canners. A pantry full of wholesome home-canned products means a better balanced diet for the entire family the year 'round. Canning home products is fascinating, convenient, avoids waste and helps build a bank account.

It is estimated that each year approximately 100,000 carloads of fresh fruits and vegetables rot on the ground in the United States as the result of glutted markets during the growing season. At least 95 per cent of this enormous waste could be turned into profit with a small investment for a home canning plant on the farm.

We carry a complete line of home canning equipment and supplies at all times. For detailed description of different home canning appliances and equipment see Kilgore's Spring catalog.

DIXIE SIMPLIFIED AUTOMATIC HOME CAN SEALER WITH CAN SAVER ATTACHMENT

One of the best home can sealers ever built. Equipped to seal No. 2 (pint) and No. 3 (quart) Sanitary cans. Can be furnished to seal No. 1 and No. 2½ cans, if desired. **Price $16.50, prepaid.**

BURPEE'S HOME CAN SEALERS

Safe, Simple, Convenient, Inexpensive, Home Can Sealers. Prices Quoted Are Prepaid.

FERTILIZERS

IF YOU FARM FOR PROFIT—USE SOILADE FERTILIZER

The one sure way to make more money from your farm operations is to use SOILADE Fertilizer. In hundreds of side by side tests, it has proved itself vastly superior to the old style fertilizers and has demonstrated that it is possible, with the same amount of labor, **to make more money from the land.** Record yields of Tomatoes, Potatoes, Beans, Peppers, Celery, Strawberries, Citrus fruit and other crops are being produced by SOILADE and invariably they have better flavor, substance and appearance and **bring better prices** on account of their fine shipping quality.

Any farmer, interested in making more money from his land, should send at once to The Kilgore Seed Company for a free copy of the new book **"MONEY-FARMING."** It tells the complete story of SOILADE and shows actual photographs of results you may expect by using this modern plant food. SOILADE is especially compounded to meet local soil requirements and, for this reason, we cannot quote general prices. Let us know your location and your crop and prices will be promptly furnished.

The analyses of all mixed fertilizers now read NITROGEN, phosphoric acid and potash, whereas under the old fertilizer law, prior to September 1, 1935, the analyses were expressed as AMMONIA, phosphoric acid and potash. For instance, under the old fertilizer law, prior to September 1, 1935, we expressed one of our most popular vegetable fertilizers as 5% ammonia, 7% phosphoric acid and 5% potash. We now show the same fertilizer as 4% nitrogen, 7% phosphoric acid and 5% potash, the 4% nitrogen being equivalent to 5% ammonia, thus not changing the fertilizer but only the method of expressing the ammonia in terms of nitrogen to conform to the new State Fertilizer Law.

BRADLEY'S AA QUALITY FERTILIZERS

Put up in 100-lb. bags. On single bag orders, prices listed are F.O.B. Plant City.
On orders for 300 lbs. and up prices listed are on a delivered basis to any point in Florida.
Bradley's AA Quality Brands of Fertilizer are properly balanced and have the greatest crop producing powers for Florida soils.

AGRICO FOR CITRUS

Nitrogen	Phosphoric Acid	Potash		Bag	Ton
4%	8%	3%	For early spring and summer	$1.70	$33.00
3%	8%	6%	For late summer	1.65	32.55
2%	8%	10%	For late fall	1.65	32.80

The above Fertilizers are made from bone-meal, guano, ground tobacco stems, superphosphate, H. G. sulphate of potash, nitrate, and sulphate of ammonia.

BRADLEY'S AA SURE CROP FERTILIZER

Nitrogen	Phosphoric Acid	Potash	Bag	Ton
2%	9%	3%	$1.35	$26.15

The best fertilizer mixture for Florida field crops. Valuable for corn, cane, sweet potatoes, cotton, peanuts, etc.

BRADLEY'S LAZARETTO TRUCK FERTILIZERS

Nitrogen	Phosphoric Acid	Potash	Bag	Ton
3%	8%	3%	$1.50	$29.45
4%	5%	5%	1.60	31.35
4%	8%	3%	1.60	31.60
4%	7%	5%	1.65	32.55

Bradley's Lazaretto Truck Fertilizers are made from H. G. sulphate of potash, superphosphate, fish, blood and bone, castor meal, cotton seed meal, nitrate and sulphate of ammonia.

BRADLEY'S LAWN FERTILIZER

Nitrogen	Phosphoric Acid	Potash	Bag	Ton
4%	7%	3%	1.40	$27.80

AGRICO

"The Fertilizer with the extra Plant Foods." Different analyses for different crops.

OTHER FERTILIZERS RECOMMENDED

WIZARD BRAND SHEEP MANURE

Wizard is pure sheep manure, highly concentrated, with all weed seeds killed. It supplies the humus and natural plant-food so needed by Florida soils.

For New Lawns use 10 to 12 pounds per 100 square feet and rake into the surface soil. On old lawns use 8 to 10 pounds scattered broadcast and wet down with a hose.

For Flowers and Shrubs mix Wizard with the soil around each plant, using 1 to 5 pounds according to size.

For Fruits and Vegetables use 1000 to 1500 pounds per acre. Apply with a drill in the row or hill. Wizard is a profitable and lasting soil-building fertilizer.

	10 lbs.	25 lbs.	100 lbs.	Ton
Wizard Brand Sheep Manure	$0.45	$0.75	$2.00	$39.00

All sheep manure prices quoted are F.O.B. Plant City and all stores.

GRANULAR AERO CYANAMID

Granular Aero Cyanamid is a fertilizer carrying both ammonia 27% and lime 70%. It is also valuable in helping to control soil disease organisms, especially nematodes. Packed in convenient, even weight, paper lined, 100-lb. sacks. 100 lbs. **$2.10;** ton **$40.00,** f.o.b. Plant City, and all stores. Call or write for interesting booklets describing its uses.

AMMO-PHOS. High analysis fertilizers induce faster growth, earlier maturity, improved quality, and increased yields of fruits and vegetables, and enable you to be among the first to harvest at highest market prices.

				Bag	Ton
Ammo-Phos No. 1	14½	24	12	$ 4.00	$79.00
Ammo-Phos No. 2	11	18	18	3.90	77.00
Ammo-Phos No. 6	16	13	8	3.50	69.00
Ammo-Phos No. A	13	46	0	3.50	69.00
Ammo-Phos No. B	20	20	0	3.00	59.00

Put up in 100-lb. bags. Prices quoted are prepaid by freight. Call or write for special pamphlets on Ammo-Phos.

Manganese Sulphate. A soil corrective for Alkaline or sweet land. Plants yellowed by Manganese starvation are easily strengthened by applications of Manganese Sulphate at the rate of from 100 to 200 lbs. per acre. Put up in 100-lb. bags. **100 lbs. $3.50; f.o.b. Plant City; ton $69.25, delivered, freight prepaid.**

GERMAN PEAT MOSS. Very good to add humus and hold moisture in seed-beds. Also an excellent poultry litter. **Prices: 1 Bale (about 100 lbs.) $2.50; f.o.b. Plant City.**

KAINIT (20%). Put up in 100-lb. bags. **100 lbs. $1.15, f.o.b. Plant City; ton $22.60; 300 lbs. and up delivered, freight prepaid.**

STEAMED BONE MEAL. 2.5 per cent nitrogen. **5 lbs. 15c; 10 lbs. 25c; 100 lbs. $1.75; f.o.b. Plant City; ton $34.95. 300 lbs. and up delivered, freight prepaid.**

NITRATE OF POTASH. It is heavy in both nitrogen and potash. **100 lbs. $2.20, f.o.b. Plant City; ton $43.45. 300 lbs. and up delivered, freight prepaid.**

NITRATE OF SODA. 19% nitrogen. Put up in 100-lb. bags, **$1.85 each, f.o.b. Plant City; ton $36.80. 300 lbs. and up delivered, freight prepaid.**

ACID PHOSPHATE (Superphosphate). Acid Phosphate is a valuable fertilizer and has corrected many plant troubles, particularly on muck soil. 16 per cent available Phosphoric Acid. **100 lbs. 95c, f.o.b. Plant City; ton $18.75. 300 lbs. and up delivered, freight prepaid.**

HARDWOOD ASHES. Fine for sour and acid soils. 2 per cent potash, put up in 100-lb bags. **100 lbs. $1.05, f.o.b. Plant City; ton $20.90. 300 lbs and up delivered, freight prepaid.**

LIME, Hydrated. Lime is a wonderful land-sweetener, and should be used on all new land that is just being cultivated. It is also a good thing for old land. Use at the rate of a half ton to a ton per acre, broadcast, before breaking the ground. If your soil is new and sour, the application should be heavier. You can use Hydrated with safety. **50-lb. bag 50c; ton $19; ½ ton at ton rate, f.o.b. Plant City.**

GOAT MANURE. 2.5 per cent Potash and 1.25 per cent nitrogen. Put up in 100-lb. bags. **100 lbs. $1.25, f.o.b. Plant City; ton $24.70. 300 lbs. and up delivered, freight prepaid.**

ON ITEMS NOT MARKED POSTPAID BE SURE YOUR REMITTANCE INCLUDES THE NECESSARY POSTAGE.

We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds or bulbs we sell, and we will not be responsible for the crop. No reputable seedsman gives any warranty. We have the fullest confidence in the quality of all the seeds we sell, but we have no control over them after they leave our hands. Satisfactory germination and production are dependent upon many factors other than the quality of the seed. This is why responsible seedsmen cannot give a warranty.

We Pride Ourselves on Having the Finest Pea Seed for Florida and the South. It Has Taken Years of Breeding and Selection to Develop This Fine Pea Seed

KILGORE'S WINNER PEAS

This variety was introduced by us, and has become very popular. It is the finest, large-podded early pea for Florida and southern sandy loam soils. For muck soils we recommend our Little Marvel variety, which has been developed and selected for high yields and trueness to type.
